CONSULTANT'S COMMENTS

☐ **A Approved** ☑ **B Approved as Noted** ☐ **C Revise and Resubmit** ☐ **D Rejected** ☐ **E No Action**

Architect/Engineer's review is aimed at ensuring general compliance with the design intent and contractual documents. Markings or comments do not absolve the Contractor/Subcontractor from adhering to the project plans and specifications, nor from any deviations. The Contractor/Subcontractor retains responsibility for the details and accuracy.

Depending on Last Approved Civil defense Data and Concept design:
1- The Submittal is approved with notes - Contractor has to submit Origin, and Test certificates.
2- Contractor Has to instruct P.O to estimate Manufacturing and Supply Period.
3- Contractor Has to submit S.D with DEEP DETAILS & Sections to every part of PUMP ROOM.

Subject: اعتماد طلمبة الحريق الرئسية -أبراج مني

السادة / شركة منى العقارية المحترمين
عناية / المهندس نبيل باجودة المحترم
تحية طيبة وبعد .....

بمراجعة الكتالوج المرسل من طرفكم الخاص بطلمبة الحريق الرئسية ماركة MENA نفيدكم بالاتي:

- تم اعتماد المضخات موديل VT150-265 قدرة 750 جالون / دقيقة ومعدل ضغط 17 بار.
- الاعتماد شامل المضخات والمحركات ولوحات التحكم والمحابس.
- الاعتماد طبقا للشهادت المقدمة من ال UL وال FM.
- يلزم على المصنع تقديم شهادة الانشاء للمضخة وكذالك شهادة الاستيراد كون بلد المنشأ غير المملكة العربية السعودية.
- يرجي التنبيه على المصنع ان يكون طول الغاطس (ال SUMP DEPTH) مطابق لعمق الخزان.
- تركيب الغرفة يكون طبقا للمخططات المعتمدة و NFPA.

Checklist for Testing Fire Set-Pump Name / Electric – Diesel - Jockey

Project:	Bandar Hamadeh for Contracting
Installation site:	Makkah Aziziya
Date of Start-Up	17/12/2023

KSB/Duplex Submersible Pump Set

Performance data:	
Pump Brand and Manufacture:	Pump Name/Origin
Pump Set Type:	Fire Fighting Pumps Set
Number of Pumps:	Electric – Diesel - Jockey
Set Location:	Fire Set Room

Condition inspection:	
Visual inspection of condition, impermeability and pressure gauge levels	Checked
Inspection of any leak in the fire set	Checked
inspection of control efficiency and smooth operation of pumps	Checked
Inspection / access to the installation room	Checked
Inspection of condition of installation area	Checked

Operating mode:	
Pump One (Electric)	AUTO
Pump Two (Diesel)	AUTO
Pump Three (Jockey)	AUTO

Fire set activation / Pressure Set point	
Electric Pump	Cut in: 160 Psi/ Cut out: 232 Psi
Diesel Pump	Cut in: 150 Psi/ Cut out: 232 Psi
Jockey Pump	Cut in: 190 Psi/ Cut out: 290 Psi
Voltage(V)	385 – 390 VOLT

Pumps testing	
Operating pump 1	Done
Operating pump 2	Done
Operating pump 3	Done
Dry running protection	-
Peak load pump 1	Checked
Peak load pump 2	Checked
Peak load pump 3	Checked
Back up pump 1	Checked
Back up pump 2	Checked
Back up pump 3	Checked
Direction of rotation	Checked

Visual check	
Check the function of the ball valve	Checked
Check pressure gauges operation	Checked
Check electrical connections	Checked
Check for any leakage in the pumps	Checked

Remarks:

Firefighting Pump Set have been tested and is functioning at full capacity with all accessories. It was handed over to the project manager and is in outstanding performance.

CERTIFICATE OF COMPLIANCE

Certificate Number	EX28929
Report Reference	EX28929
Issue Date	2023-JANUARY-04

Issued to: MENA MECH IND CO.
Sharjah Al Sajaa Industrial Shed 6
Victory Warehouse, Sajja New Industrial Area
Sharjah, United Arab Emirates

This certificate confirms that representative samples of

Centrifugal Fire Pumps, End Suction

See Addendum for Models

Have been evaluated by UL in accordance with the Standard(s) indicated on this Certificate.

Standard(s) for Safety: ANSI/CAN/UL 448 – Centrifugal Stationary Pumps for Fire-Protection Service

Additional Information: See UL Product iQ® at https://iq.ulprospector.com for additional information.

This Certificate of Compliance indicates that representative samples of the product described in the certification report have met the requirements for UL certification. It does not provide authorization to apply the UL Mark. Only the Authorization Page that references the Follow-Up Services Procedure for ongoing surveillance provides authorization to apply the UL Mark.

Only those products bearing the UL Mark should be considered as being UL Certified and covered under UL's Follow-Up Services.

Look for the UL Certification Mark on the product.

Deborah Jennings-Conner, VP Regulatory Services

UL LLC

CERTIFICATE OF COMPLIANCE

Certificate Number EX28929
Report Reference EX28929
Issue Date 2023-JANUARY-04

This is to certify that representative samples of the product as specified on this certificate were tested according to the current UL requirements.

CERTIFICATE OF COMPLIANCE

Certificate Number UL-US-2245391-0
Report Reference EX26402-20221129
Date 1-Dec-2022

Issued to: TAIZHOU TAIDONG FIRE & MARINE POWER LTD
NO 51 XINGJIANG ROAD, PRIVATE ECONOMIC INDUSTRIAL CENTER
JIANGYAN DISTRICT TAIZHOU, JIANGSU 225500
China

This is to certify that representative samples of QYLU - Internal-combustion Engines for Driving Stationary Fire Pumps

See Addendum Page for Product Designation(s).

Have been evaluated by UL in accordance with the Standard(s) indicated on this Certificate.

Standard(s) for Safety: UL 1247 , Edition: 5, Issue Date: 2007-5-31 , Revision Date: 2020-8-12

Additional Information: See the UL Online Certifications Directory at https://iq.ulprospector.com for additional information

This Certificate of Compliance indicates that representative samples of the product described in the certification report have met the requirements for UL certification. It does not provide authorization to apply the UL Mark. Only the Authorization Page that references the Follow-Up Services Procedure for ongoing surveillance provides authorization to apply the UL Mark.

Only those products bearing the UL Mark should be considered as being UL Certified and covered under UL's Follow-Up Services.

Look for the UL Certification Mark on the product.

Pump Controllers, Fire

See General Information for Pump Controllers, Fire

TORNATECH INC EX3971
#132
7075 PLACE ROBERT-JONCAS
ST LAURENT, QC H4M 2Z2 CANADA

Fire Pump Controllers: Models AF, AFP, AFR, AFY, ATF, ATR, ATP or ATY followed by C or N, followed by additional suffixes. All of the above controllers are suitable for use on circuits capable of delivering high fault currents. The withstand ratings are as follows:

Circuit Breaker	Max V AC	Max Short Circuit Current RMS Symmetrical Amps
MZMH6-63, MZMH6-100,	208; 240	25000; 42,000
MZMH6-160, MZMH6-250		
MZMH6-63, MZMH6-100,	480	65,000
MZMH6-160, MZMH6-250		

The controllers provided with Automatic Transfer Switches are suitable for use on circuits capable of delivering high fault currents. The withstand rating of the normal power source side is determined by the transfer switch as indicated below:

ASCO Transfer Switch	Max Controller Short Circuit Withstand Rating
9403704	22KA, 480 VAC Max
94031004	22KA, 480 VAC Max
94032604	35KA, 480 VAC Max

The withstand ratings for the alternate power source side will be dependent upon the ratings of the external circuit breaker provided. But in no case will they exceed those of the normal power source side.

Models AL or AL1 followed by additional suffixes.

All of the above controllers are suitable for use on circuits capable of delivering high fault currents. The withstand ratings are as follows:

Circuit Breaker	Max V AC	Max Short Circuit Current RMS Symmetrical Amps
NZM6B-63,	480	25,000
NZM6B-100, NZM6B-160		

The controllers provided with automatic Transfer Switches are suitable for use on circuits capable of delivering high fault currents. The withstand rating of the entire controller is determined by the transfer switch as indicated below:

ASCO Transfer Switch	Max Controller S. C. Withstand Rating
9403704	22KA, 480 VAC Max
94031004	22KA, 480 VAC Max
94032604	25KA, 480 VAC Max

The withstand ratings for the alternate power source side will be dependent upon the ratings of the external circuit breaker provided. But in no case will they exceed those of the normal power source side.

Authorities having jurisdiction should be consulted in all cases.

Model FPD Series controller for engine-driven centrifugal fire pumps.

Models FPA, FPP, FPR, FPS, FPV, FPW, FPY, VPA, VPR, and VPS may be followed by additional suffixes. The withstand ratings are as follows:

Withstand Ratings of Controllers Without Transfer Switch:

Short Circuit Withstand Ratings (Ampere Symmetrical)		
VOLTAGE	**STANDARD**	**OPTIONAL HIGH**
200 to 480 V	100,000A RMS	150,000A RMS
575 to 600 V	50,000A RMS	100,000A RMS

Models ATG , ATU, VPG or VPU. The controllers provided with Automatic Transfer Switches are suitable for use on circuits capable of delivering high fault currents. The withstand rating of the normal power side is the same as the withstand ratings of controllers without transfer switches. The withstand rating of the alternate power side is determined by the transfer switch as indicated by the following tables:

Withstand ratings of controllers with 120 A Tornatech Inc. Transfer Switch

200-208V 50/60 Hz MAX HP	230-240V 50/60 Hz MAX HP	380-416V 50/60 Hz MAX HP	440-480V 50/60 Hz MAX HP	600V 60Hz MAX HP	Withstand Rating (A)
40	40	—	—	—	65,000
—	—	60	75	—	25,000
—	—	—	—	100	18,000

Withstand Ratings For Controllers with Ascolectric Transfer Switches

Transfer Switch (A)	200-208V 50/60 Hz Max HP	230-240V 50/60 Hz Max HP	Withstand Rating		Specific** Withstand Rating (A)
			(A)	Time (Cycles)	
100	30	30	10000	1.5	22000
150	50	50	1000	1.5	22000
400	150	150	35000	3	42000
600	N/A	N/A	50000	3	65000

** Tested and found suitable for 100kA

Withstand Ratings for Controllers with Ascolectric Transfer Switches, Continued

Transfer Switch (A)	600V 60 Hz Max HP	Withstand Rating		Specific Withstand Rating (A)
		(A)	Time (Cycles)	
100	75	10000	1.5	N/A
150	150	1000	1.5	N/A
400	400	22000	3	N/A
600	N/A	N/A	N/A	N/A

Model ATU or VPU:	Normal Power Side:	Same as withstand rating of controller without transfer switch.
	Alternate Power Side:	Same as withstand rating of controller without transfer switch.

Model FPL:	Limited Service controllers with withstand ratings as follows:

Short Circuit Withstand Ratings of Limited Service Controllers Without Transfer Switches		
VOLTAGE	**STANDARD**	**OPTIONAL HIGH**
200 to 480 V	25,000 A RMS	65,000 A RMS
575 to 600 V	18,000 A RMS	25,000 A RMS

Model LTG, GLG:	Automatic transfer switch for connection to a generator set.
Model LTU:	Automatic transfer switch for connection to a 2nd utility.

Withstand ratings of Controller with transfer switch Model FPAT (Tornatech):

Model LTG:	Normal Power Side:	Same as withstand rating of controller without transfer switch.
	Alternate Power Side:	Withstand rating only applies when the generator set is protected by a molded case circuit breaker

TRANSFER SWITCH AMPERES	200-480 V H.P.	WITHSTAND RATING AMPERES
120	30	25,000

TRANSFER SWITCH AMPERES	600 V H.P.	WITHSTAND RATING AMPERES
120	30	18,000

Model LTU:	Normal Power Side:	Same as withstand rating of controller without transfer switch.
	Alternate Power Side:	Same as withstand rating of controller without transfer switch.

Withstand ratings of controller with transfer switch Model 940 (Ascolectric):

Model LTG:	Normal Power Side:	Same as withstand rating of controller without transfer switch.
	Alternate Power Side:	Withstand rating only applies when the generator set is protected by a molded case circuit breaker not exceeding the ampere rating of the transfer switch.

Transfer Switch A	200-480 V Max HP	Withstand Rating		Specific Withstand Rating A
		A	Time	
120	30	10,000	1.5	22,000

Transfer Switch A	600 V Max HP	Withstand Rating		Specific Withstand Rating A
		A	Time	
120	30	10,000	1.5	N/A

Model LTU:	Normal Power Side:	Same as withstand rating of controller without transfer switch.
	Alternate Power Side:	Same as withstand rating of controller without transfer switch.

Models CPA, CPP, CPR, CPS, CPV, CPW, CPY, may be followed by additional suffixes. The withstand ratings are as follows:

Withstand ratings of controllers without transfer switch:

Short circuit withstand ratings (ampere symmetrical)		
voltage	**standard**	**optional**
200 to 480 V	100 kA	150 kA
575 to 600 V	50 kA	100 kA

Model CPU - The controllers provided with automatic transfer switches are suitable for use on circuits capable of delivering high fault currents. The withstand rating of the normal power side and the alternate power side is the same as the withstand ratings of controllers without transfer switches.

Model CPU

Short circuit withstand rating for alternate power circuit with transfer switch (RMS Symmetrical)		
V	**Standard**	**High (optional)**
200 to 480 V	100 kA	150 kA
575 to 600 V	50 kA	100 kA

Model GPD Series controller for engine-driven centrifugal fire pumps.

Overcurrent Protection Panels, Model OPD; may be followed by a number 200 through 575 with - or /; followed by a number 200 through 600 with /; followed by a number 10 through 500 with /; followed by 1 or 3 with /; followed by 50 or 60 or 50/60. - These panels provide separate overcurrent protection and disconnect to comply with NFPA 70 Article 695.4(B)(2)(a) and 695.4(B)(3) and NFPA 20 Article 9.2.3.1, 9.2.3.4, and 9.2.3.4.1.

Short Circuit Withstand Ratings, A Symmetrical			
V	**Standard**	**High (Optional)**	**High Capacity**
200-480	25,000	35,000 to 65,000	150,000

575-600	18,000	20,000 to 25,000	50,000 to 100,00

Battery chargers, BCE10, followed by 12 or 24, followed by 120 or 220.

Fire pump controllers, horsepower rated, Models GPA, GPAe, GPP, GPR, GPS, GPV, GPY, GPYe or GPW; may be followed by a number 110 through 575 with - or /; followed by a number 200 through 600 with /; followed by a number 1 through 500 with /; followed by 1 or 3 with /; followed by 50 or 60 or 50/60.

Fire pump controllers, kilowatt rated, Models GPA, GPAe, GPP, GPR, GPS, GPV, GPY, GPYe or GPW; followed by -400/; followed by a number 0.75 through 315 with kW/; followed by 3 with /; followed by 50 or 60 or 50/60.

Transfer switch, horsepower rated, Model GPU; may be followed by a number 110 through 575 with - or /; followed by a number 200 through 600 with /; followed by a number 1 through 500 with /; followed by 1 or 3 with /; followed by 50 or 60 or 50/60.

Transfer switch, kilowatt rated, Model GPU; followed by -400/; followed by a number 0.75 through 315 with kW/; followed by 3 with /; followed by 50 or 60 or 50/60.

Withstand ratings of normal power circuit for GPA, GPAe, GPP, GPR, GPS, GPV, GPY, GPYe and GPW controllers with or without gpu transfer switch.

Short Circuit Withstand Ratings for normal power circuit with or without transfer switch, A Symmetrical		
V	Standard	High (Optional) +
200-480	100,000	150,000
575-600 +	50,000	100,000
+ - Not applicable to controllers that use NOARK Power Components.		

Limited service fire pump controllers, kilowatt rated, Models GPL; followed by -400/; followed by a number 0.75 through 315 with kW/; followed by 3 with /; followed by 50 or 60 or 50/60.

Limited service fire pump controllers, , kilowatt rated, Models GPL; followed by -400/; followed by a number 0.75 through 315 with kW/; followed by 3 with /; followed by 50 or 60 or 50/60.

Limited service transfer switch, for connection to a second utility, horsepower rated, Model GLU; may be followed by a number 110 through 575 with - or /; followed by a number 200 through 600 with /; followed by a number 1 through 500 with /; followed by 1 or 3 with /; followed by 50 or 60 or 50/60.

Limited service transfer switch, for connection to a second utility, kilowatt rated, Model GLU; followed by -400/; followed by a number 0.75 through 315 with kW/; followed by 3 with /; followed by 50 or 60 or 50/60.

Withstand ratings of normal power circuit for GPL controller with or without GLU transfer switch.

Short Circuit Withstand Ratings for normal power circuit with or without transfer switch, A Symmetrical		
V	Standard	High (Optional)
200-240	65,000	-
380-480	25,000	65,000
575-600	18,000	25,000

Certificate of Compliance

This certificate is issued for the following:

Controllers for Electric Motor Driven and Diesel Engine Driven Fire Pumps

Model GPx Series electric motor driven and Model GPD diesel engine driven fire pump controllers manufactured at Tornatech FZE in Dubai, UAE

Prepared for:

TornaTech Inc.
7075 Pl Robert-Joncas, #132
St Laurent, QC H4M 2Z2
Canada

Manufactured at:

TornaTech FZE
Warehouse CC-4 near R/A 08
P.O. Box 18435, Jebel Ali
Dubai, United Arab Emirates

FM Approvals Class: 1321/1323

Approval Identification: 0003052698

Approval Granted: June 24, 2014

To verify the availability of the Approved product, please refer to www.approvalguide.com

Said Approval is subject to satisfactory field performance, continuing Surveillance Audits, and strict conformity to the constructions as shown in the Approval Guide, an online resource of FM Approvals.

CERTIFICATE OF COMPLIANCE

This certificate of compliance validates the following

TEST REPORT NUMBER:	3052698	TEST CERTIFICATE NUMBER:	3052698
DATE OF ISSUE:	24 June, 2014	DATE OF ISSUE:	24 June, 2014
DATE OF EXPIRY:	NONE	DATE OF EXPIRY:	NONE

NAME OF FACTORY/ MANUFACTURER: TORNATECH INC.

ADDRESS/REGION: 7075 PLACE ROBERT-JONCAS, #132
SAINT LAURENT, QUEBEC
H4M 2Z2 CANADA

NAME OF THE BRAND(S): TORNATECH FZE
Warehouse CC-4 near R/A 08
P.O. Box 18435, Jebel Ali
Dubai, United Arab Emirates

MODEL/NO: GPx series
GPD series

CERTIFICATION MARK: FM APPROVED

LOGO ON THE PRODUCT: TORNA TECH

DESCRIPTION OF THE PRODUCT: Samples of the GPx series and GPD series were submitted for examination and testing. All testing and analysis was conducted and verified to be in compliance with the Standards listed in the Test Standards section below

TEST STANDARD: FM Approvals, Approval Standard for Controllers for Electric Motor and Diesel Engine Driven Fire Pumps, Class 1321/1323, dated November 2007

TEST DESCRIPTION: All testing and analysis considered appropriate was conducted and verified to be in compliance with the Standards listed in the Test Standards section. All data is on file at FM Approvals along with other documentation and correspondence applicable to this program.

SPECIFICATION OF TEST SPECIMEN: The samples were considered to be representative of the product line and were examined, tested, and compared to the manufacturer's drawings.

TEST RESULTS: Pass

NAME OF TEST FACILITY:	FM Approvals
TEST FACILITY ADDRESS/REGION:	
LABORATORY CONTACT:	Mr. Richard Dunne
CONTACT PHONE:	1-401-567-5701
CONTACT EMAIL:	Richard.Dunne@fmapprovals.com
PRODUCT APPLICATION GUIDELINE (END USE):	Installations shall comply with the manufacturer's instructions.

SIGNED BY:

The above certificate is valid only when installed in accordance with the "Product Application Guideline (End Use)" as stated above. To verify the validity of the product please log into our website, www.approvalguide.com.

FM APPROVED

Certificate of Compliance

This certificate is issued for the following:

Fire Pump Flowmeter Systems
(See complete listing details below)

Prepared for:

Quest Engineering dba Gerand Engineering
2300 Edgewood Avenue South
St. Louis Park, MN 55426

FM Approvals Class: 1046

5000 (18 925)	10, 12	GV-5000-10, 12	GO-5000-10, 12

Each system consists of a Gerand Venturi (GV) or a Gerand Orifice (GO), a differential meter reading in gpm or dm³/min and associated fittings.

GV systems can be equipped with either a 4 1/2 in. dial meter (Gerand Model K) or a 6 in. dial meter (Gerand Model M). GO systems are only available with a 4 1/2 in. dial meter (Gerand Model I). Permanent installations (wall or panel mount) or portable installations are available on all systems. Rated working pressure is 500 psi (3445 kPa) except that:

GV systems with Model M dial meter have a rated working pressure of 175 psi (1205 kPa).

GV systems with Model K dial meter and Class 150 flanges have a rated working pressure of 275 psi (1905 kPa).

The following end-connection styles are available:

Venturi (1)/VS. Brass screw ends, 1 1/4 through 2 1/2 in.

Venturi (1)/VW-B. Steel butt-welded ends, 2 1/2 through 12 in.

Venturi (1)/V-GE. Steel grooved ends, 2 1/2 through 12 in.

Venturi (1)/VW-F. Steel flanged ends, 2 1/2 through 12 in. Class 150 flanges rated at 275 psi (1905 kPa). Class 300 flanges rated at 500 psi (3445 kPa).

Orifice (2). Steel socket-welded ends with adaptability for flanging, 2 1/2 through 12 in.

MENA
MECHANICAL INDUSTRIES CO.

COMPANY PROFILE

CEO MESSAGE

Mena Mech Ind co has undergone a remarkable evolution in the past six years in the UAE. In the last 37 years in the Middle East, we've pursued our vision to become the leading fire pump systems provider in the Middle East and north Africa. But one of the most profound changes that have taken place over time is that we have a deeper and richer understanding, commitment and sustainability that has come into focus as we have refined our views of what it means to be a leader.

Today, as a result, we are increasingly adapting Mena strategies, operations and culture to drive positive results across our experience and provide a superior quality product to serve the commitments.

Our commitment in MENA is much stronger than ever. Indeed, one of the most important aspects of growth, opportunities for our company depends on solving engineering challenges a reality that is making sustainability a competitive imperative in the industry.

We also know our Customer's expectations from a leading company like Mena.

Our Company Profile will provide multiple examples of our commitment for supply, operation and after sales service, across wide range of products, from Fire Pump Solutions to pumps of the water sector, along with engineering Solutions etc.

MENA branches expands in all UAE emirates, Egypt, Palestine, Sudan, GCC Countries, and North Africa to serve our client.

With your continuous support and trust, Mena now poised to further grow its Middle east and north Africa network. In the end, I appreciate your business commitment.

Eng. Mamoun A. Al-Burieni
Chief Executive Officer

VISION

MENA MECH aspires to be among the leading companies of the field in the MENA region, renowned and recognized around the globe for offering comprehensive, professional services & products of the highest quality for its distinctive clients.

MISSION

MENA is committed to providing its clients with service and products of the highest quality; offering a comprehensive platform of services and products. Promoting the personal, and social career growth of all employees, adding to the human knowledge of contributing to culture, social and economic progress of society preserving and promoting the Arab, Islamic culture, heritage and history; and contributing to the advancement of firefighting and security of lives of people living in the middle east and north Africa.

VALUES

- Commitment to our clients.
- Be reliable and add value to our customers.
- Empowerment, Intergrity, Excellence and Collaboration.
- Trust our employees to make the right decisions.
- Show transparency in everything we do.
- Operate professionally, safely & effectively.
- Cooperation; work as one team to deliver value.

MENA MECHANICAL INDUSTRIES CO.

OUR **STRATEGY**

GUIDING PRIORITIES

A major and comprehensive company:
Mena Fire Fighting offers varieties of Pumping Solutions, in the field of firefighting and Water Applications.

• Client Success:
The company is committed to enriching its client's success within an economy rich environment.

• Emphasis on Quality:
The standard of our company enhances us to practice a diversity of designs that allow and evaluates the client's request. Our effectiveness and practicality of all the services and products offered by the company are to provide the best result for our clients.

• Supportive:
Our company emphasizes the importance of our services and products by providing the required training to operate the product and maintenance period to ensure that the client receives the maximum benefit of our services and products supplied.

• Global Vision:
Our Company takes pride in being a part of an international Supply chain with partner companies around the globe.

• Research Intensive:
Our company is continuously making strident moves to establish itself nationally and internationally through extensively researching the latest technologies in the field.

• Engagement With The Community:
Our company plays a vital role in the social and economic development and safety of UAE and middle east by introducing the most advanced technologies with affordable and competitive prices.

THE COMPANY

Since 2017, our Headquarters has been located in the Emirate of Dubai. MENA MECH IND CO is charged with an ambitious growth with the mission to protect people of the United Arab Emirates, and middle east Countries by providing world-class fire pump solutions manufacture by MENA MECH IND CO.

Mena is efficiently covering its Services by having a regional office in Egypt, Sudan and various other locations in the Middle East.

Mena Mech IND CO is the sole distributor throughout the Gulf Countries for its products, which are approved from Civil defense in many countries including UAE.

This company profile includes a complete illustration and real pictures of production process, starting from engineering, casting, machining, manufacturing, and ending with assembly.

The experts of MENA MECH IND CO are well managed, dedicated and well-versed with knowledge research and development in all aspects of Pumping Solutions. They are also supported with a qualified team of engineers and technicians with years of experiences to provide the best quality service to clients. and has an outstanding track record of delivering products on time and are punctual in providing services at regular intervals; this has been the bases of establishing a strong relationship with the clients.

MENA MECH IND CO has a well-equipped workshop for maintenance service as per International standards.

MENA MECH IND CO commits to consistently demonstrate the highest ethical standards in our actions through innovative solutions, honoring our agreements and being transparent in our communications.

Our value and service meets our customer expectations because we build and maintain a good relationship with them to ensure long-term satisfaction.

END SUCTION FIRE PUMP

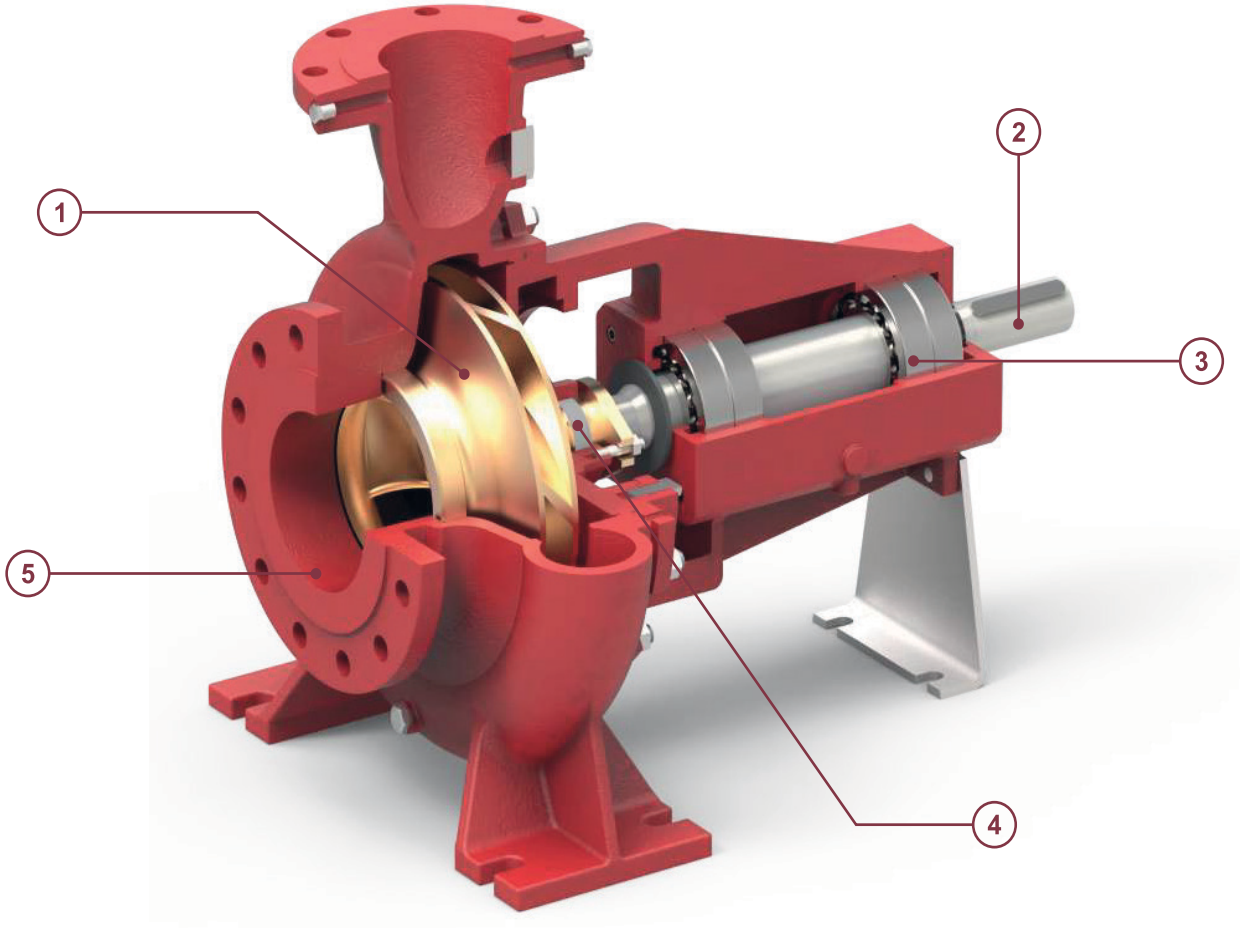
General Pump Features



1 - Impeller & Casing

- Impeller is dynamically balanced to grade G6.3 balance quality in accordance to ISO 1940-1.
- Impeller & Casing are designed using state of art CFD tools to ensure optimal performance.

2 - Shaft

- Heavy duty stainless steel shaft completely sealed and dry for zero corrosion available upon request.
- Short and rigid with negligible vibrations.
- Replaceable shaft protecting sleeves.
- No threads exposed to pump medium, long operating life and no corrosion.
- Adjustment-free assembly.

3 - Bearing

- Heavy duty and permanently grease lubricated antifriction bearings for long service life.
- Open gland, enough space for service activities.

4 - Seal

- Asbestos - free, soft packed stuffing boxes.

5 - Casing

- End Suction backpullout design permits maintenance of the pump without removing the pipes.
- Rugged Ball Bearings on Drive as well as Non Drive end.
- Flange drilled as per ANSI B16.1 class 250.
- Smooth surface inside & CED coated for superior corrosion protection.
- Replaceable wear ring protect the casing and the impeller running clearances.
- Heavy duty casing design for high working pressure.

FIRE PUMP SKIDS

MENA MECH IND CO is an established well reputed manufacturer of Premium Custom Engine Driven Centrifugal Fire Pump Skids. We specialized in designing and developing packages in compliance to NFPA 20 requirements with Listed & Approved Drivers.

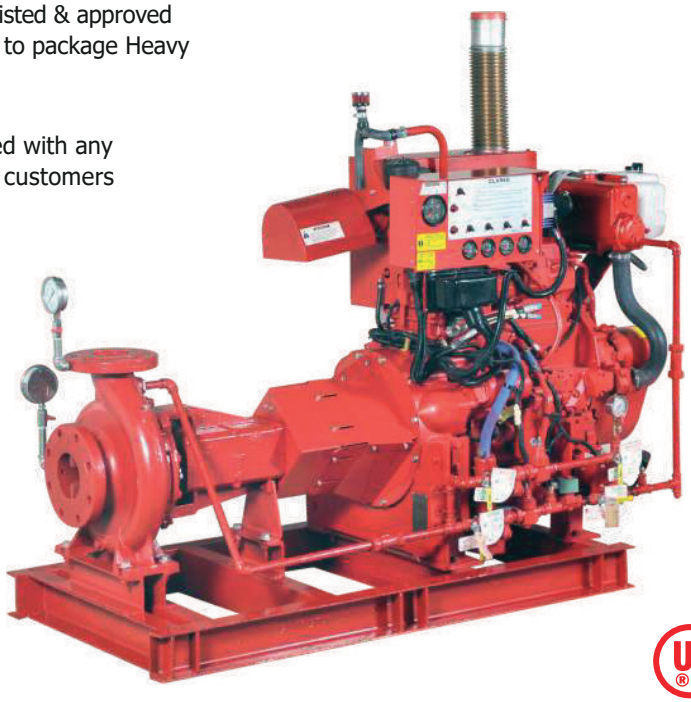
MENA ofers listed Centrifugal Fire Pump Skids that meet every fre protection need.

- Driven by Listed & Approved Diesel Engines or Electric Motors.
- Well aligned and Coupled for Direct Operation.
- Skid Packages are Pre-Tested and Inspected thoroughly before release to customers.
- One piece base plate with Anchor Bolt holes.
- Engineered, coated, hot rolled mild steel to resist corrosion and abrasion.
- Heavy Fabricated C-Channel Structure constructed to provide proper alignment of Pump with Diesel Engine or Pump with Motor.
- Compact skid Design with Small Foot-Print for Retroft.
- High standard of Quality in material Construction fnish and Workmanship.

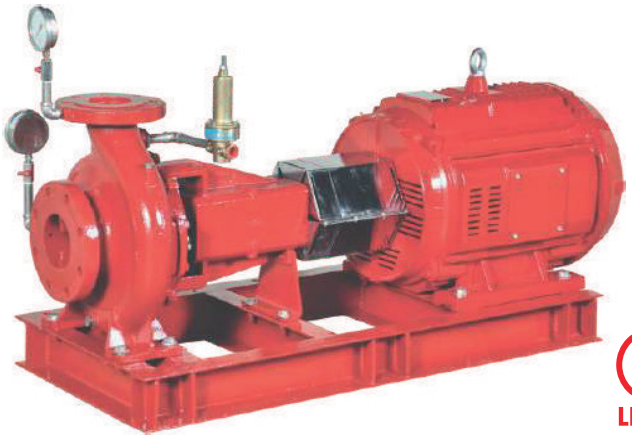
DIESEL DRIVEN SKIDS

MENA maintains its standard with using it's proudly own listed & approved Black Stallion Diesel Engines and Centrifugal Fire Pumps to package Heavy Duty and High Quality Compact Skids.

Our Listed and Approved Fire Pumps can also be coupled with any other Listed Diesel Engine of any specifc brand as per customers requirement.



UL LISTED



MOTOR DRIVEN SKIDS

MENA maintains its standard with using WEG which is High Efciency Fire Pump Motors with our own Listed and Approved Centrifugal Fire Pumps to package Heavy Duty and High Quality Compact Skids.

Our Listed and Approved Fire Pumps can also be coupled with any other Listed Fire Pump Motors of any specifc brand as per client requirement.

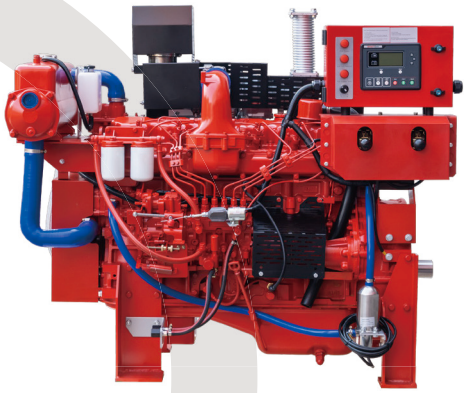
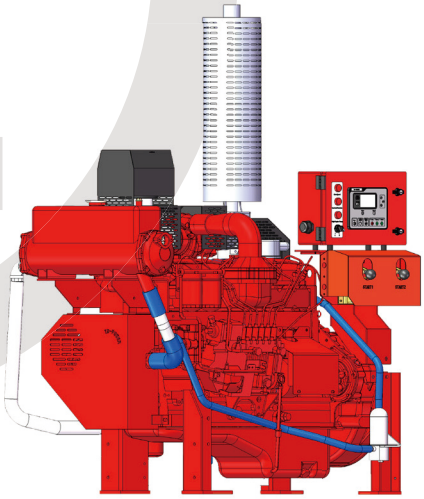
TAIDONG

UL Listed Fire Pump Engines 24HP-262HP

Specification

Engine Model		6110THE
Engine Type		Vertical, Water-cooling 4-stroke, direct-injection
Cooling Method		Heat Exchanger
Aspiration		Turbo-Charged
Number of Cylinders		6
Bore x Stroke (mm)		110*125
Compression Ratio		17.5:1
Total Displacement(L)		7.12
Net Power	KW/HP	136/185
Rated Speed	r/min	2920
Rated Torque	N.m	507
Fuel Consumption	Gal/hr	12.84
Rotating Direction at Output End		Counter-clockwise
Lubrication Oil Standard		CD15W40
Lubrication Oil Content	L	14
Lubrication Method		Pressure and Splash
Starting Method		Electric 24V
PTO Type		Stub Shaft
Net Weight	kgs	880

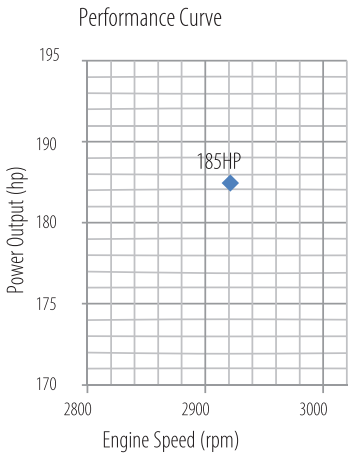


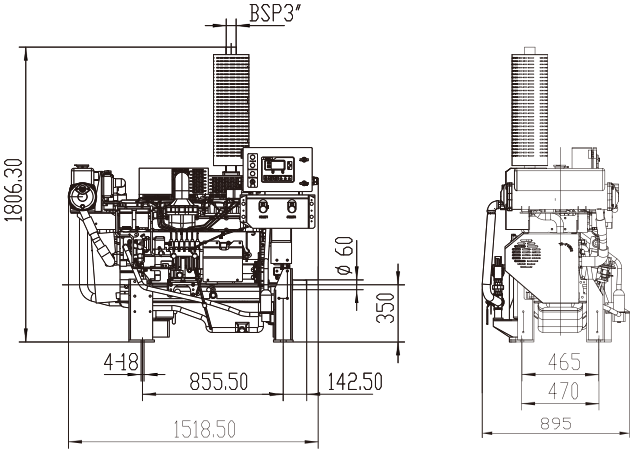


Engine Ratings Baselines

Engines are not to be used for continuous duty. Engines are to be used only for stationary emergency standby fire pump.

Engines are rated at standard SAE conditions of 29.61 in. (7,521 mm) Hg barometer and 77°F (25°C) inlet temperature (approximates 300ft. (91.4m) above sea level)





TAIDONG

UL Listed Fire Pump Engines 24HP-262HP

General Engine Data Sheet	
Engine Model	6110THE
Ignition Type	Compression (Diesel)
Number of Cylinders	6
Bore and Stroke - mm(inch)	110x 125(4.31x4.90)
Displacement - L(inch^3)	7.12(614)
Compression Ratio	17.5 : 1
Valve per cylinder - Intake	1
Exhaust	1
Combustion System	Direct Injection
Engine Type	In-Line, 4 Stroke, Direct injector
Aspiration	Turbo
Firing Order	1-5-3-6-2-4
Charge Air Cooling Type	Turbo-charged
Rotation(Viewed from Flywheel end) - Clockwise	Counter-Clockwise
Engine Crankcase Vent System	Open
Installation Drawing	6110THE-01(refer to Opertaion manual)
Power Rating - Approved	
Engine Nameplate Power - HP(kW)	185(136)
Max Power - HP(kW)	210(155)
Speed - r/min	2920
Cooling system	
Engine Coolant Heat - Btu/sec(kW)	95(100)
Engine Radiated Heat - Btu/sec(kW)	70.53(74.8)
Heat Exchanger minimum Flow	
60°F (16°C) Raw Water - US.gal/min (LPM)	37.5(142)
100°F (38°C) Raw Water - US.gal/min (LPM)	40(151)
Heat Exchanger Maximum Cooling Water	
Inlet Pressure - lb/in^2 (bar)	13.8 (2)
Flow - gal/min (LPM)	40(150)
Raw water inlet size- Inch	BSP1¼
Raw water outlet size- Inch	BSP1½
Thermostat, Start to Open - °F (°C)	149 (65)

TAIDONG

	Grounding system	• Negative
	Battery chargers	• Two independent fully automatic • 10A continuous charge • 500mA trickle charge
Electrical Reading	• Battery 1 & Battery 2 voltage • Battery 1 & Battery 2 charging amperage • Charging mode	
Pressure Reading	• Continuous system pressure display • Cut-in and cut-out pressure setting	
Pressure and Event Recorder	• Pressure readings with date stamp • Event recording with date stamp • Under regular maintained operation, events are stored in memory for the life of the controller. • Data viewable on operator interface display screen • Downloadable by USB port to external memory device	

Pressure sensing	• Pressure transducer and run test solenoid valve assembly for fresh water application • Pressure sensing connection 1/2” Female NPT • Drain connection 3/8” • Rated and calibrated for 0-500psi working pressure • Externally mounted with protective cover
Audible Alarm	Alarm buzzer - 85dB at 3 meters
Visual Indications	• Engine run • Main switch AUTO • Main switch in OFF • Main switch in HAND • Periodic test • Cranking Cycle • AC Power available • Pump room temperature (ºF or ºC)
Visual & Audible Alarms	Visual only • Pump room trouble • Pump on demand • AC Failure • Charger 1 & 2 Failure • Weak battery 1 & 2 • Battery 1 & 2 overvoltage • Loss of continuity 1 & 2 • High fuel level • Fuel tank leak • PLD low suction pressure • High raw water temperature • Low pump room temperature • Service required • ECM warning • Weekly test cut-in not reached • Check weekly test solenoid • Pressure transducer fault • Invalid Cut-In Visual and Audible • Engine trouble • Controller trouble • Engine low oil pressure • Engine high temperature • Engine low temperature • Engine overspeed • DC Failure • Battery 1 & 2 Failure • Engine fail to start • Low fuel level • ECM fault • ECM SS in Alternate Position • Fuel injection malfunction
Remote Alarm Contacts	DPDT-8A-250V.AC • Engine run • Common controller trouble • Charger #1 & Charger #2 failure • Pressure transducer fault • Common engine trouble • High engine temperature • Battery #1 & battery #2 failure • Overspeed • Fail to start • DC failure • Fail when running • Fuel injection malfunction** • Loss of continuity (starter) #1 and/or #2 • Low oil pressure • ECM selector switch in alternate position*** • PLD low suction pressure • Common pump room trouble (field re-assignable)* • Low fuel level • Low pump room temperature • AC Failure • High fuel level • High pump room temperature • Fuel tank leak • H-O-A selector switch in OFF or HAND • Free (field programmable)*

*Except if option C13 is ordered. Tornatech reserves the right to use any of these four alarm points for special specific application requirements
**Applicable to electronic engines only.
*** Applicable to electronic engines only. Alarms when ECM selector switch on the engine is in alternate mode.

Terminals for Field Connections for External Devices	• Low fuel level • Remote AUTOMATIC start • Water reservoir low (re-assignable) • Fuel tank leak (re-assignable) • High fuel level (re-assignable)		
ViZiTouch V2.1 Operator Interface	• Embedded microcomputer with software PLC logic • 7.0” color touch screen (HMI technology) • Upgradable software • Multi-language		
Operation	**Selector Switch**	• Hand-Off-Auto • Behind lockable and breakable cover	
	Automatic Start	• Start on pressure drop • Remote start signal from automatic device	
	Manual Start	• Crank 1 and Crank 2 start pushbuttons • Run test pushbutton	

	Crank Cycle	• 6 consecutive cycle attempts
		  • 3 X 15s crank from battery 1 or 2 alternatively
		  • 15s rest in between each crank attempt	

	Stopping	• Manual with Stop pushbutton • Automatic after expiration of minimum run timer ****	
	Timers	**Field Adjustable & Visual Countdown**	• Minimum run timer ****(off delay) • Sequential start timer (on delay) • Periodic test timer
	Actuation	**Visual Indication**	• Pressure • Non-pressure
	Mode		• Automatic • Non-automatic
Communication Protocol Capability	• Protocol: Modbus • Connection type: Shielded female connector RJ45 • Frame Format: TCP/IP • Addresses: See bulletin MOD-GPD

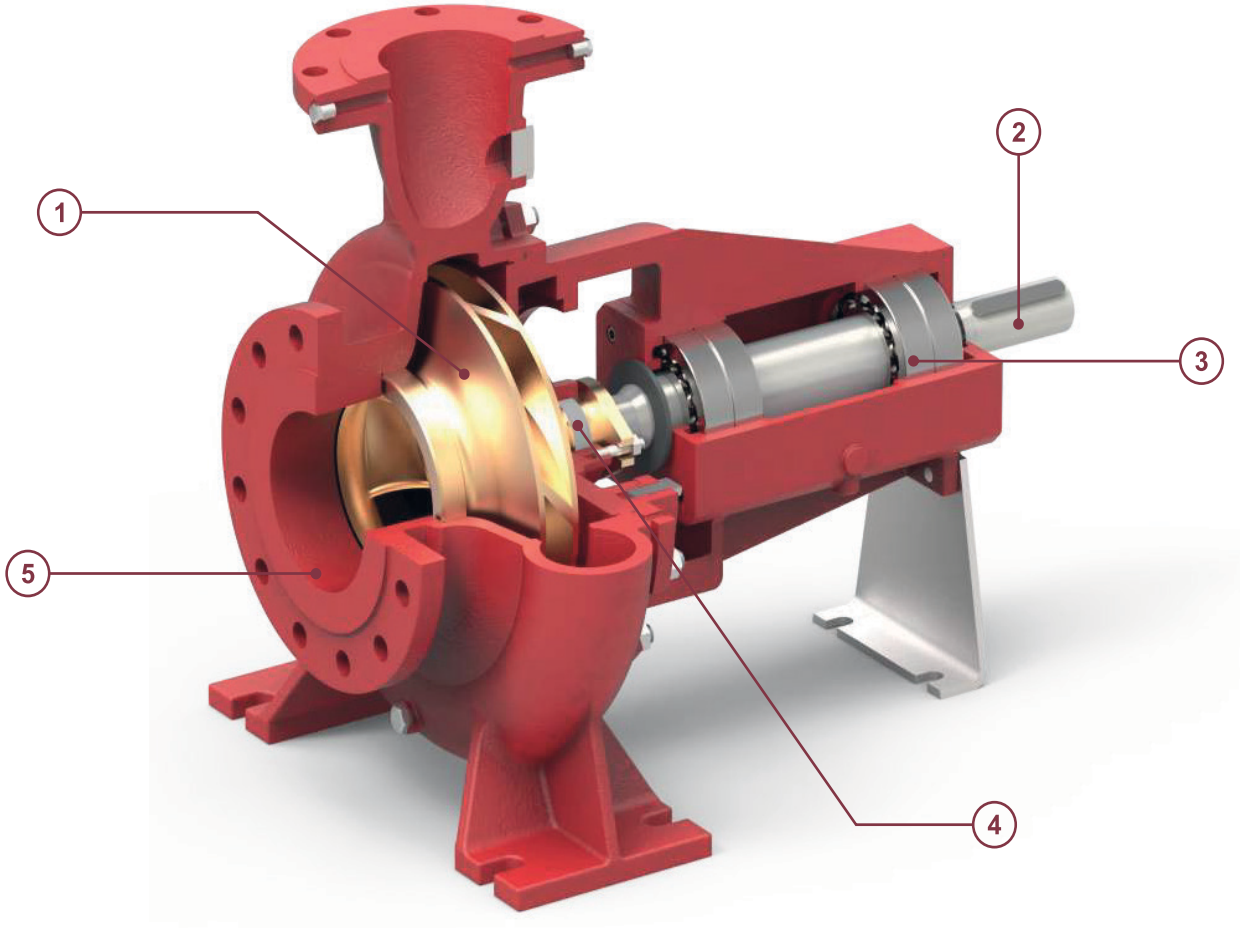
General Pump Features



1 - Impeller & Casing

- Impeller is dynamically balanced to grade G6.3 balance quality in accordance to ISO 1940-1.
- Impeller & Casing are designed using state of art CFD tools to ensure optimal performance.

2 - Shaft

- Heavy duty stainless steel shaft completely sealed and dry for zero corrosion available upon request.
- Short and rigid with negligible vibrations.
- Replaceable shaft protecting sleeves.
- No threads exposed to pump medium, long operating life and no corrosion.
- Adjustment-free assembly.

3 - Bearing

- Heavy duty and permanently grease lubricated antifriction bearings for long service life.
- Open gland, enough space for service activities.

4 - Seal

- Asbestos - free, soft packed stuffing boxes.

5 - Casing

- End Suction backpullout design permits maintenance of the pump without removing the pipes.
- Rugged Ball Bearings on Drive as well as Non Drive end.
- Flange drilled as per ANSI B16.1 class 250.
- Smooth surface inside & CED coated for superior corrosion protection.
- Replaceable wear ring protect the casing and the impeller running clearances.
- Heavy duty casing design for high working pressure.

FIRE PUMP SKIDS

MENA MECH IND CO is an established well reputed manufacturer of Premium Custom Engine Driven Centrifugal Fire Pump Skids. We specialized in designing and developing packages in compliance to NFPA 20 requirements with Listed & Approved Drivers.

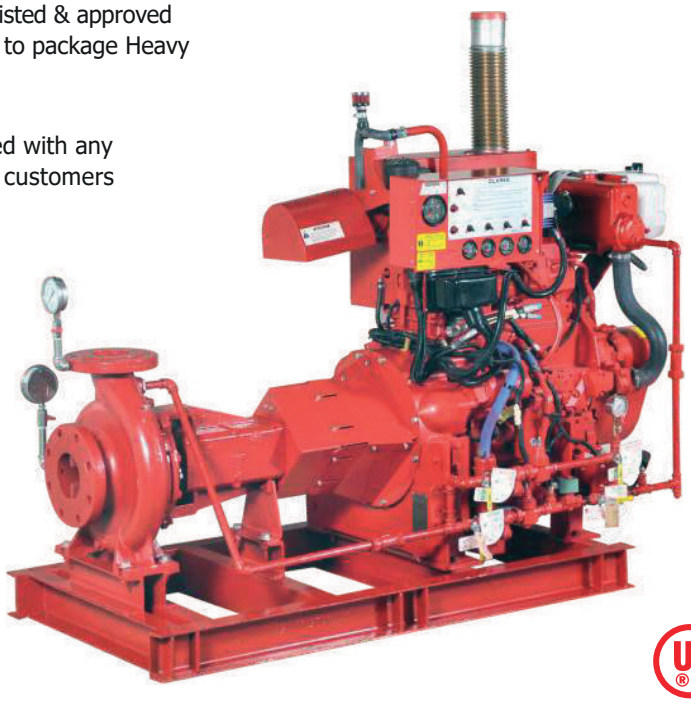
MENA ofers listed Centrifugal Fire Pump Skids that meet every fre protection need.

- Driven by Listed & Approved Diesel Engines or Electric Motors.
- Well aligned and Coupled for Direct Operation.
- Skid Packages are Pre-Tested and Inspected thoroughly before release to customers.
- One piece base plate with Anchor Bolt holes.
- Engineered, coated, hot rolled mild steel to resist corrosion and abrasion.
- Heavy Fabricated C-Channel Structure constructed to provide proper alignment of Pump with Diesel Engine or Pump with Motor.
- Compact skid Design with Small Foot-Print for Retroft.
- High standard of Quality in material Construction fnish and Workmanship.

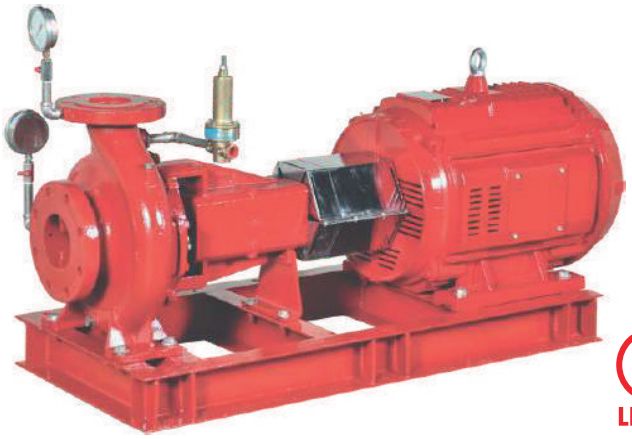
DIESEL DRIVEN SKIDS

MENA maintains its standard with using it's proudly own listed & approved Black Stallion Diesel Engines and Centrifugal Fire Pumps to package Heavy Duty and High Quality Compact Skids.

Our Listed and Approved Fire Pumps can also be coupled with any other Listed Diesel Engine of any specifc brand as per customers requirement.



UL LISTED



MOTOR DRIVEN SKIDS

MENA maintains its standard with using WEG which is High Efciency Fire Pump Motors with our own Listed and Approved Centrifugal Fire Pumps to package Heavy Duty and High Quality Compact Skids.

Our Listed and Approved Fire Pumps can also be coupled with any other Listed Fire Pump Motors of any specifc brand as per client requirement.

FOLLOW-UP SERVICE PROCEDURE
(TYPE 8)

COMPONENT - MOTORS
(PRGY2.PRGY8)

Manufacturer: SEE ADDENDUM FOR MANUFACTURING LOCATIONS

Applicant: (100029-614) SHANGHAI TOP MOTOR CO LTD
303 KANGLIU RD
KANGQIAO INDUSTRIAL AREA
HAINUI
SHANGHAI
201315 CHINA

Recognized Company: (100029-614) SAME AS APPLICANT

This Procedure authorizes the above manufacturer to use the marking specified by Underwriters Laboratories Inc.(UL), or any authorized licensee of UL, only on products covered by this Procedure, in accordance with the applicable UL Services Agreement.

The prescribed Mark or Marking shall be used only at the above manufacturing location on such products which comply with this Procedure and any other applicable requirements.

The Procedure contains information for the use of the above named Manufacturer and representatives of Underwriters Laboratories Inc. and is not to be used for any other purpose. It is lent to the Manufacturer with the understanding that it is not to be copied, either wholly or in part, and that it will be returned to Underwriters Laboratories Inc. (UL) or any authorized licensee of UL, upon request.

This PROCEDURE, and any subsequent revision, is the property of Underwriters Laboratories Inc.(UL) and the authorized licensee of UL and is not transferable.

Underwriters Laboratories Inc.

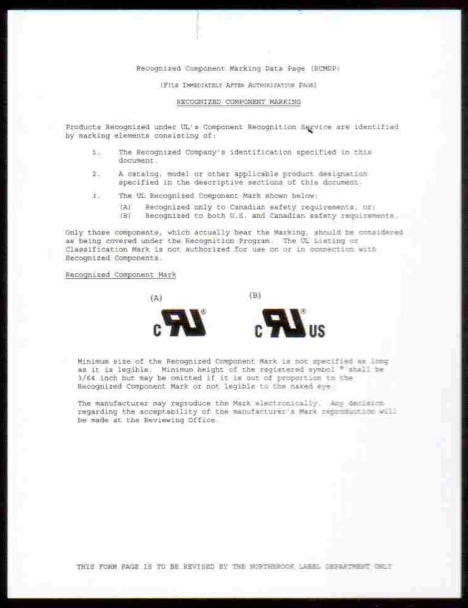
North American Certification Program



Recognized Component Marking Data Page (RCMDP)

(File Immediately After Authorization Page)

RECOGNIZED COMPONENT MARKING

Products Recognized under UL's Component Recognition Service are identified by marking elements consisting of:

1. The Recognized Company's identification specified in this document.
2. A catalog, model or other applicable product designation specified in the descriptive sections of this document.
3. The UL Recognized Component Mark shown below:
   (A) Recognized only to Canadian safety requirements, or:
   (B) Recognized to both U.S. and Canadian safety requirements.

Only those components, which actually bear the Marking, should be considered as being covered under the Recognition Program. The UL Listing or Classification Mark is not authorized for use on or in connection with Recognized Components.

Recognized Component Mark

(A) (B)

Minimum size of the Recognized Component Mark is not specified as long as it is legible. Minimum height of the registered symbol ® shall be 1/64 inch but may be omitted if it is out of proportion to the Recognized Component Mark or not legible to the naked eye.

The manufacturer may reproduce the Mark electronically. Any decision regarding the acceptability of the manufacturer's Mark reproduction will be made at the Reviewing Office.

THIS FORM PAGE IS TO BE REVISED BY THE NORTHBROOK LABEL DEPARTMENT ONLY

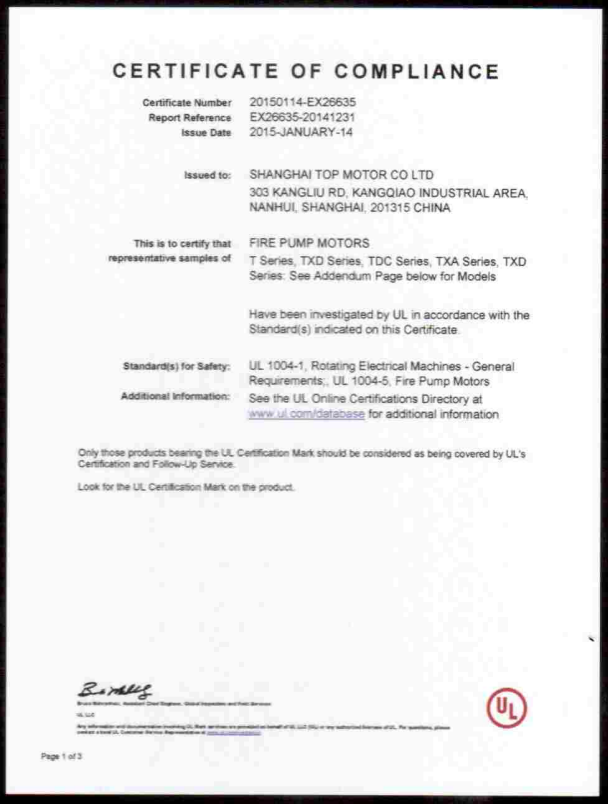
Various Certificates



CERTIFICATE OF COMPLIANCE

Certificate Number	20150114-EX26635
Report Reference	EX26635-20141231
Issue Date	2015-JANUARY-14
Issued to:	SHANGHAI TOP MOTOR CO LTD 303 KANGLIU RD, KANGQIAO INDUSTRIAL AREA, NANHUI, SHANGHAI, 201315 CHINA
This is to certify that representative samples of	FIRE PUMP MOTORS T Series, TXD Series, TDC Series, TXA Series, TXD Series: See Addendum Page below for Models
	Have been investigated by UL in accordance with the Standard(s) indicated on this Certificate.
Standard(s) for Safety:	UL 1004-1, Rotating Electrical Machines - General Requirements;, UL 1004-5, Fire Pump Motors
Additional Information:	See the UL Online Certifications Directory at www.ul.com/database for additional information

Only those products bearing the UL Certification Mark should be considered as being covered by UL's Certification and Follow-Up Service.

Look for the UL Certification Mark on the product.

Bruce Mahrenholz, Assistant Chief Engineer, Global Inspection and Field Services

TECHNICAL DATA

PRODUCT FEATURES			
Model	F-TDC447TS200U2B		
Standard	**NEMA MG-1**	Output rating	**200 HP**
Frequency	**60 Hz**	Mounting	**Foot-mounted**
Voltage	**380-400 V**	Flange	**Without**
Number of poles	**2**	Mounting	**F-1**
Degree of Protection	**IP23**	Terminal box[1]	**Left position**
Synchronous speed	**3600 rpm**	Enclosure	**IC01 - ODP**

PRODUCT DETAILS			
Frame	**447TS**	Frequency	**60 Hz**
Output	**200 HP (150 kW)**	Number of Poles	**2**
Slip	**0.0083**	Rated speed	**3570 rpm**

Ambient Temperature Rating	**Standard**: ☐ 4°C to 40°C / 39°F to 104°F **Optional**: ☑ 4°C to 55°C / 39°F to 131°F Controllers built in Dubai, UAE (Tornatech FZE) are supplied standard with 55°C rating.
Surge Suppression	Surge arrestor rated to suppress surges above line voltage
Disconnecting Means	• Isolating switch and circuit breaker assembly: - Door interlocked in the ON position - Isolating switch rated not less than 115% of motor full load current - Circuit breaker continuous rating not less than 115% of motor full load current - Overcurrent sensing non-thermal type, magnetic only - Instantaneous trip setting of not more than 20 times the motor full load current • Common flange mounted operating handle
Service Entrance Rating	Suitable as service entrance equipment
Emergency Start Handle	• Flange mounted • Integrated limit switch • Pull and latch activation • Across the line start (direct on line)
Locked Rotor Protector	• Operate shunt trip to open circuit breaker • Trip between 8 and 20 seconds • Factory set at 600% of motor full load current
Electrical Readings	• Voltage phase to phase (normal power) • Amperage of each phase when motor is running
Pressure Readings	• Continuous system pressure display • Cut-in and Cut-out pressure settings
Pressure and Event recorder	• Pressure readings with date stamp • Event recording with date stamp • Under regular maintained operation, events are stored in memory for the life of the controller. • Data viewable on operator interface display screen • Downloadable by USB port to external memory device
Pressure Sensing	• Pressure transducer and run test solenoid valve assembly for fresh water application • Pressure sensing line connection 1/2” Female NPT • Drain connection 3/8” • Rated for 0-500PSI working pressure (standard display at 0-300PSI) • Externally mounted with protective cover

Audible Alarm	6” alarm bell - 85 dB at 10ft. (3m)
Visual Indications	• Power available • Motor run • Periodic test • Manual start • Deluge valve start • Remote automatic start • Remote manual start • Emergency start • Pump on demand/Automatic start • Pump room temperature (ºF or ºC) • Lockout
Visual & Audible Alarms	Visual • Control voltage not healthy • Invalid cut-in • Lock rotor current • Loss of power • Low ambient temperature • Low water level • Motor trouble • Phase reversal (normal power) • Overcurrent • Overvoltage • Phase loss L1 • Phase loss L2 • Phase loss L3 • Phase unbalanced • Pressure transducer fault detected • Pump on demand • Pump room alarm • Service required • Undercurrent • Undervoltage • Check weekly test solenoid • Weekly test cut-in reached Visual and audible • Fail to start
Remote Alarm Contacts	DPDT-8A-250V.AC • Power available • Phase reversal • Motor run • Common pump room alarm (field re-assignable)** • Overvoltage • Undervoltage • Phase unbalance • Low pump room temperature • High Pump room temperature • Common motor trouble (field re-assignable)** • Overcurrent • Fail to start • Undercurrent • Ground fault • Free (field programmable)**

**Tornatech reserves the right to use any of these three alarm points for special specific application requirements.

ViZiTouch V2 Operator Interface	• Embedded microcomputer with software PLC logic • 7.0” color touch screen (HMI technology) • Upgradable software • Multi-language		
Communication Protocol Capability	• Protocol: Modbus • Connection type: Shielded female connector RJ45 • Frame Format: TCP/IP • Addresses: See bulletin MOD-GPx		
Operation	**Automatic Start**	• Start on pressure drop • Remote start signal from automatic device • Deluge valve start	
	Manual Start	• Start pushbutton • Run test pushbutton • Remote start from manual device	
	Stopping	• Manual with Stop pushbutton • Automatic after expiration of minimum run timer ***	
	Timers	Field Adjustable & Visual Countdown	• Minimum run timer ***(off delay) • Sequential start timer (on delay) • Periodic test timer
	Actuation	Visual Indication	• Pressure • Non-pressure
	Mode		• Automatic • Non-automatic

***Can only be used if approved by the AHJ

☐	A4	Flow switch provision
☐	A8	Foam pump application w/o pressure transducer and run test solenoid valve.
☐	A9	Low zone pump control function
☐	A10	Middle zone pump control function
☐	A11	High zone pump control function
☐	A13	Non-pressure actuated controller w/o pressure transducer and run test solenoid valve
☐	A16	Lockout/interlock circuit from equipment installed inside the pump room
☐	B11	Built in alarm panel (120V.AC supervisory power) providing indication for: • Audible alarm & silence pushbutton for motor run, phase reversal, loss of phase. • Pilot lights for loss of phase & supervisory power available
☐	B11B	Built in alarm panel same as B11 but 220-240VAC supervisory power
☐	B19A	High motor temperature c/w thermoster relay and alarm contacts (DPDT)
☐	B19B	High motor temperature c/w PT100 relay and alarm contacts (DPDT)
☐	B21	Ground fault alarm detection c/w visual indication and alarm contact (DPDT)
☐	C1	Extra motor run alarm contact (DPDT)
☐	C4	Periodic test alarm contact (DPDT)
☐	C6	Low discharge pressure alarm contact (DPDT)
☐	C7	Low pump room temperature alarm contact (DPDT)
☐	C10	Low water reservoir level alarm contact (DPDT)
☐	C11	High electric motor temperature alarm contact (DPDT)
☐	C12	High electric motor vibration c/w visual indication and alarm contact (DPDT)
☐	C14	Pump on demand / automatic start alarm contact (DPDT)
☐	C15	Pump fail to start alarm contact (DPDT)
☐	C16	Control voltage healthy alarm contact (DPDT)
☐	C17	Flow meter valve loop open c/w visual indication and alarm contact (DPDT)
☐	C18	High water reservoir level c/w visual indication and alarm contact (DPDT)

☐	C19	Emergency start alarm contact (DPDT)
☐	C20	Manual start alarm contact (DPDT)
☐	C21	Deluge valve start alarm contact (DPDT)
☐	C22	Remote automatic start alarm contact (DPDT)
☐	C23	Remote manual start alarm contact (DPDT)
☐	C24	High pump room temperature alarm contact (DPDT)
☐	C25	Second set of standard alarm contacts (DPDT) (Typical for city of Los Angeles and Denver)
☐	Cx	Additional visual and alarm contact (Specify function) (DPDT)
☐	D1	Low suction pressure transducer for fresh water rated at 0-300PSI with visual indication and alarm contact
☐	D1A	Low suction pressure transducer for sea water rated at 0-300PSI with visual indication and alarm contact
☐	D5	Pressure transducer and run test solenoid valve for fresh water rated for 0-500PSI (for factory calibration purposes only)
☐	D5D	Pressure transducer and run test solenoid valve for sea water rated for 0-500PSI
☐	D10	Omit mounting feet (when applicable)
☐	D13	High withstand rating for: • 200V to 208V @ 150HP max. = 150kA* • 200V to 208V @ 200HP = 100kA* • 220V to 240V @ 200HP max. = 150kA* • 220V to 240V @ 250HP = 100kA* • 380V to 415V @ 300HP max. = 150kA* • 380V to 415V @ 350HP to 450HP = 100kA* • 440V to 480V @ 400HP max. = 150kA* • 440V to 480V @ 450HP to 500HP = 100kA* • 600V @ 500HP max. = 100kA*
☐	D13A	High withstand rating for: • 380V to 480V = 65kA* • 600V = 25kA*
☐	D13B	High withstand rating for: • 200V to 208V @ 150HP max. = 200kA* • 220V to 240V @ 200HP max. = 200kA* • 380V to 415V @ 300HP max. = 200kA* • 440V to 480V @ 400HP max. = 200kA*
☐	D14	Anti-condensation heater & thermostat
☐	D14A	Anti-condensation heater & humidistat
☐	D14B	Anti-condensation heater & thermostat & humidistat

*For fire pump controller section only.
Note: Options chosen from this page are not electrically represented on the wiring schematics in this submittal package.

☐ D15	Tropicalization
☐ D18	CE Mark with factory certificate
☐ D26	Modbus with RTU frame format and RS485 connection
☐ D27	Motor heater connection (external single phase power source and heater on/off contact)
☐ D27A	Motor heater connection (internal single phase power source and heater on/off contact)
☐ D28	Customized drawing set
☐ D34A	Field programmable I/O board - 5 Input / 5 output
☐ D43	Seismic Certification compliant to CBC 2019, IBC 2018 rigid base/wall mounted only
☐ D44	Special Seismic Certification compliant to OSHPD rigid base/wall mounted only

☐ L01	Other language and English (bilingual)
☐ L02	French
☐ L03	Spanish
☐ L04	German
☐ L05	Italian
☐ L06	Polish
☐ L07	Romanian
☐ L08	Hungarian
☐ L09	Slovak
☐ L10	Croatian
☐ L11	Czech
☐ L12	Portuguese
☐ L13	Dutch
☐ L14	Russian
☐ L15	Turkish

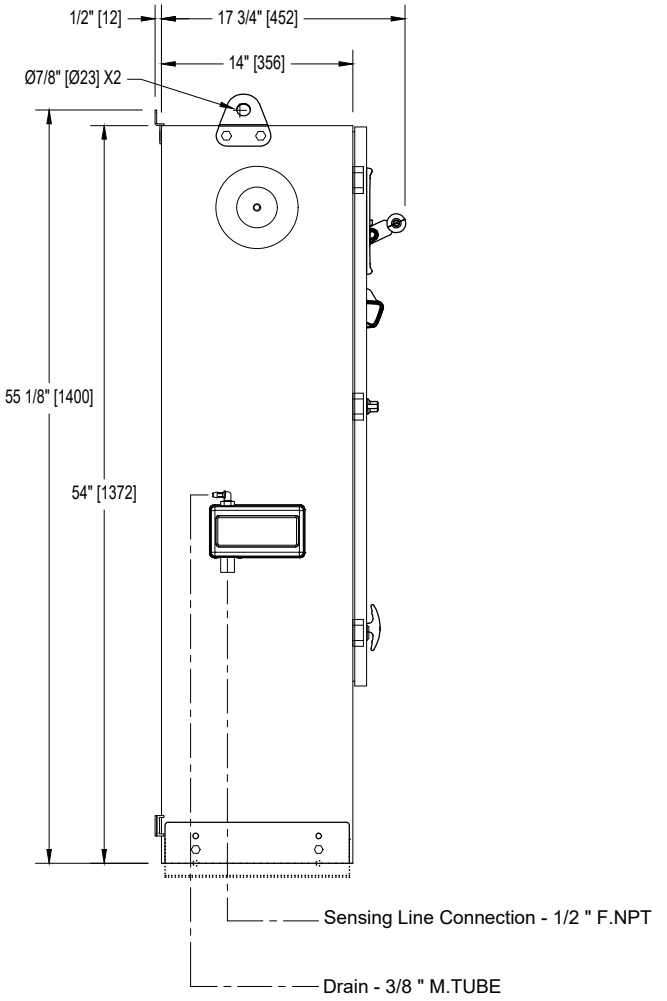
8 - USB port

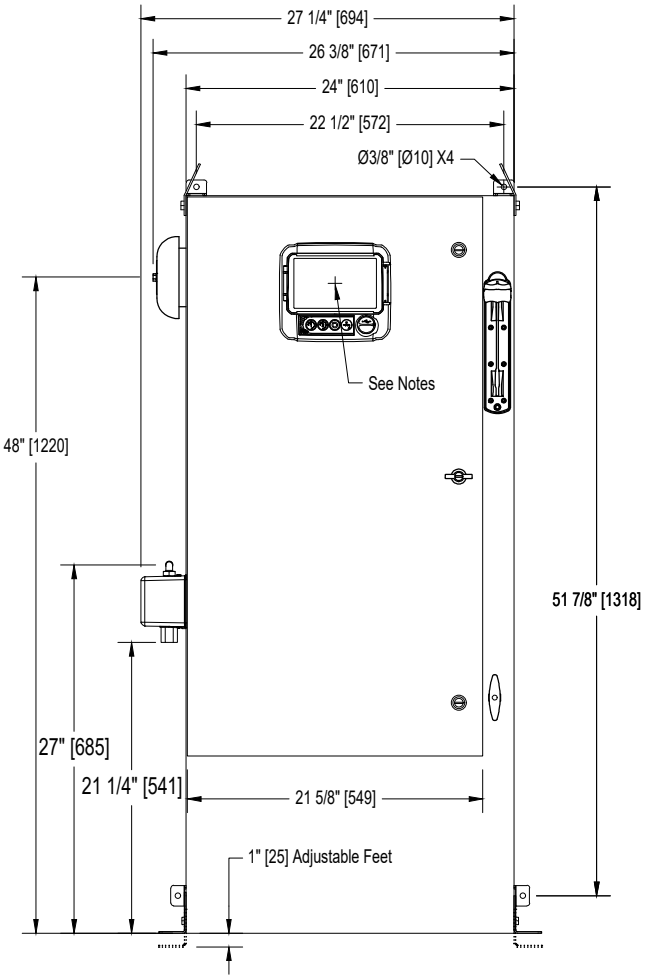
Electric Fire Pump Controller

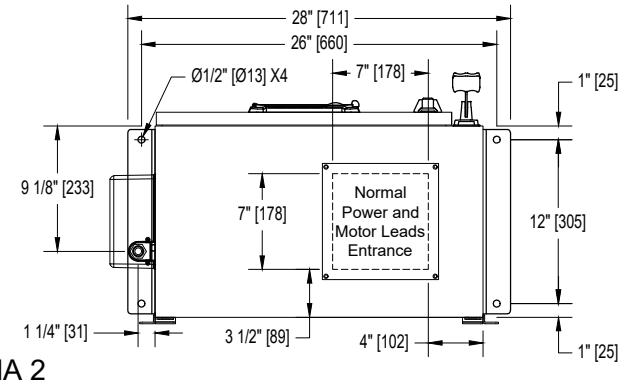
Model: GPA/GPP/GPY

Dimensions

Built to the latest edition of the NFPA 20 standard







Voltage / Power Table		
Voltage	Min HP	Max HP
208	40	60
220 - 240	40	75
380 - 400 - 415	75	125
440 - 480	75	150
600	100	200

Notes:

- Standard NEMA: NEMA 2
- Standard paint : textured red RAL 3002.
- All dimensions are in inches [millimeters].
- Center of ViZiTouch screen: 47-5/8" [1208] from Bottom.
- Bottom conduit entrance through removable gland plate recommended.
- Use watertight conduit and connector only.
- Protect equipment against drilling chips.
- Door swing equal to door width.

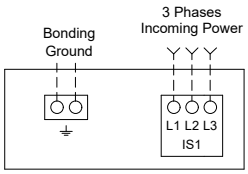
Terminal Diagram and Sizing for Isolating Switch

Built to the latest edition of the NFPA 20 standard

Power Terminals



Notes:
1 - For proper wire sizing, refer to NFPA70 and NEC (USA) or CEC (Canada) or local code.
2 - Controller suitable for service entrance in USA.
3 - For more accurate motor connections refer to motor manufacturer or motor nameplate.
4 - Controller is phase sensitive. Incoming lines must be connected in ABC sequence.

COPPER CONDUCTORS for Isolating Switch (IS1).

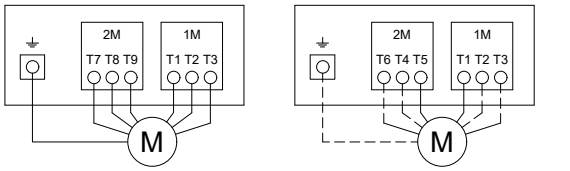
Electric Fire Pump Controller

Model: GPX

Terminal Diagram and Sizing For GPP,GPY & GPW

Built to the latest edition of the NFPA 20 standard

Motor Terminals



Model : GPP Models : GPW & GPY

Notes:
1 - For proper wire sizing, refer to NFPA70 and NEC (USA) or CEC (Canada) or local code.
2 - Controller suitable for service entrance in USA.
3 - For more accurate motor connections refer to motor manufacturer or motor nameplate.
4 - Controller is phase sensitive. Incoming lines must be connected in ABC sequence.

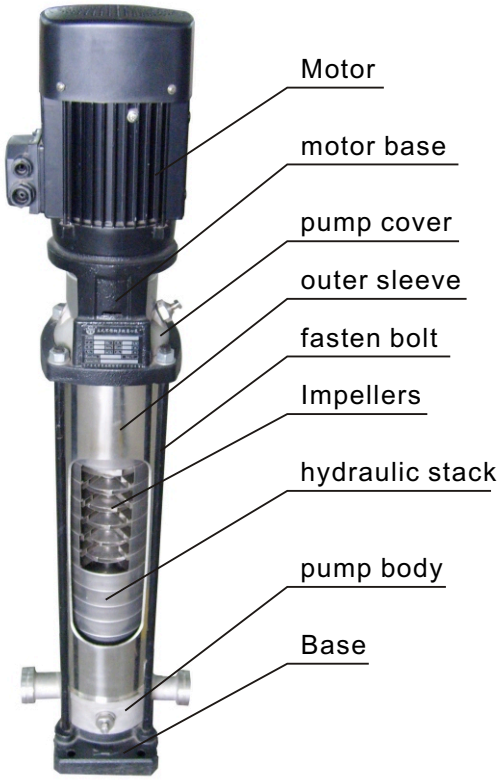
Pump

RVA and RV are non-self priming vertical multistage centrifugal pump, the pumps are available with standard motor, the inlet and outlet are located at the pump bottom at the same plane (inline type).
All pumps are equipped with a maintenance-free mechanical seal set of the cartridge type.

Fig.1 RVA



Motor

RVA and RV are fitted with a totally enclosed、fan-cooled、2-pole、three-phase standard motor. From 0.37kW to 2.2kW, are also available with single-phase motor.(1*220-230V/240V).

Motor Protection

Single-phase motor have a built-in thermal overload switch.
Three-phase motors must be connected to a motor protective circuit breaker according to local regulations.

Ambient temperature

Ambient temperature: maximum+40℃, if the ambient temperature exceeds +40℃, or the pump is installed at an altitude exceeding 1000 meters, the motor must not be fully loaded due to the risk of overheating.
Overheating may result from excessive ambient temperatures or the low density and consequently low cooling effect of the air.
In such cases ,it may be necessary to use a motor with a higher rated output.

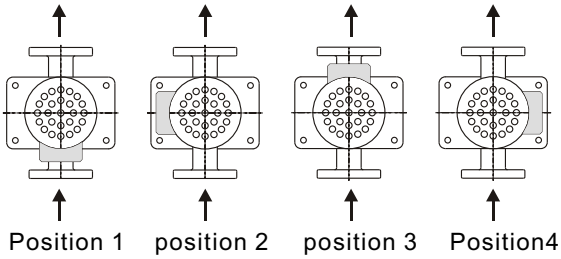
Terminal box positions

As standard the terminal box is mounted on the suction side of the pump, meanwhile, 0°,90°,180°,270° could be adjusted according to the following proceeding:

1.If necessary, disassembling the protective cover of the shaft connector, but did not disassembling the shaft connector.
2.Disassembling the motor fixation screws.
3.Turn the motor to the required direction.
4.Fasten the motor screws.
5.Install the shaft connector's protective cover.

The voltage and frequency are marked on the label, the correct power should be confirm with the label before usage.
To ensure the electric connection is conformity to the drawing marked on the label inside the terminal box.

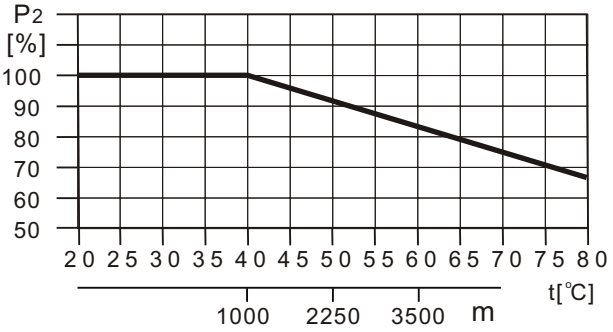
Fig2. Terminal box positions



Viscosity

The pumping of liquids with densities or kinematic viscosities higher than those of water will cause a considerable pressure drop, a drop in the hydraulic performance and a rise in the power consumption.
In such situations the pump should be fitted with a larger motor, if in doubt.

Fig.3 Relationship between motor output (P2) and temperature



Example:
From the Fig.3, the pump is installed at an altitude exceeding altitude 3500 meters, P2 will decrease to 88%, if the ambient temperature is up to 70℃,P2 will decrease to 78%.

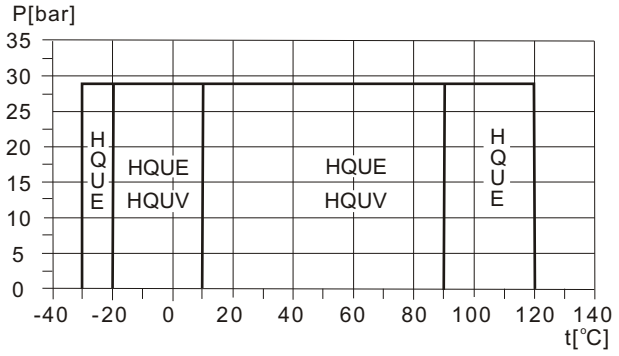
Operating range of the shaft seal

The operating range of the shaft seal depends on operating pressure, pump type, type of shaft seal and liquid temperature.The range shown in fig 4. Applies to clean water and water with glycol liquids.

Fig.4 Operating range of standard shaft seals



maximum inlet pressure

The following table shows the maximum permissible inlet pressure. However, the actual inlet pressure the pressure against a closed valve must always be lower than the maximum permissible operating pressure.
If the maximum permissible operating pressure is exceeded , the bearing in the motor may be damaged and the life of the s haft seal reduced.

RV,RVA 1	
RV,RVA1-2 → RV,RVA1-25	10bar
RV,RVA1-27	15bar
RV,RVA 2	
RV,RVA2-2 → RV,RVA2-26	10bar

RV,RVA64-2 → RV,RVA64-5-2	15bar
RV,RVA 90	
RV,RVA90-1-1 → RV,RVA90-2-2	10bar
RV,RVA90-2-1 → RV,RVA90-4-2	15bar

Example of operating and inlet pressures :

The values for operating and inlet pressures shown in the table must not be considered in dividually but must always be compared,see the following examples.

Example 1:
pump model:RVA-5-20-A-FGJ-E-HQUE
Max.operating pressure:25bar
Max.inlet pressure:15bar
discharge pressure against a closed valve: 13.7bar,see page31.
the pump is not allowed to start at an inlet pressure of 15 bar, but at an inlet pressure of 25-13.7=11.3bar.

Example 2:
MODEL:RVA15-3-A-P-E-HQUE
Max.operating pressure:16bar
Max.inlet pressure:8bar
discharge pressure against a closed valve: 4.2bar,see page39 curves chart.

This pump is allowed to start at an inlet pressure of 6bar, as the discharge pressure against a closed valve is only 4.2bar,which results in an operating pressure of 6+4.2=10.2bar. On the contrary , the max. Operating pressure of this pump limited to 12.2bar, as a higher operating pressure bigger than 8bar will require on the Inlet.

selection of pumps

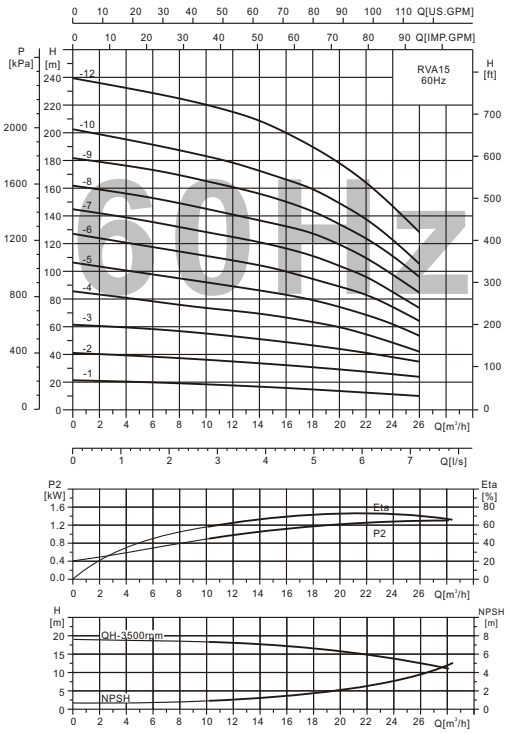
selection of pumps should be based on:

- the duty point of the pump(see page12).
- dimensional data such as pressure loss as a
- result of height differences,friction loss in the pipework,pump efficiency etc.(see page12).
- pump materials(see page6,7,8)
- pump connections(see page13)
- shaft seal(see page13)

1. Duty point of the pump

From a duty point it is possible to select a pump on the basis of the curve charts shown in "performance curves/technical" data.

Fig.5 example of curve chart



2.dimensional data

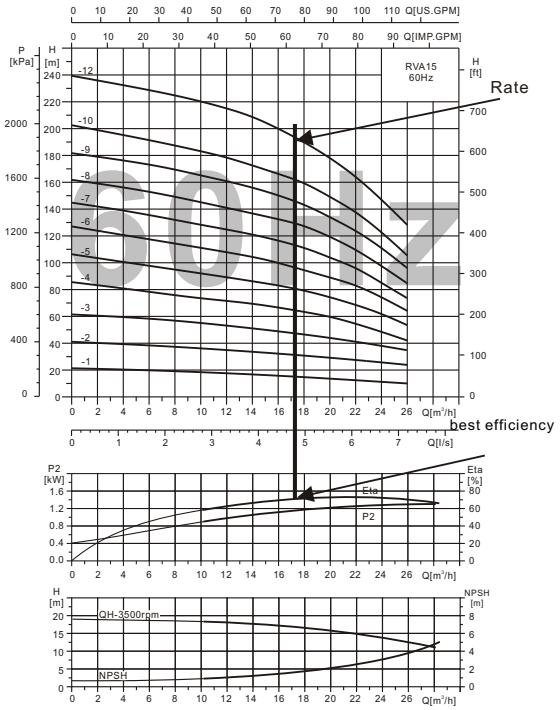
When sizing a pump the following must be taken into accounting:

- Required flow and pressure at the draw-off point.
- Pressure loss as a result of height differences(H_{geo}).
- Friction loss in the pipework(H_f) It may.
- Best efficiency at the estimated duty point.
- NPSH value.
- For calculation of the NPSH value, see corresponding curves chart.

pump efficiency

Before determining the best efficiency point, the operation pattern of the pump needs to be identified. If the pump expected to operate as the same duty point, then select a RVA pump which is ope-ratingat a duty point corresponding with the best efficiency of the pump.

Fig.6 example of duty point



As the pump is sized on the basis of the highest possible flow, it is important always to have the duty point to the right on the efficiency curve(eta) in order to keep efficiency high when the flow drops.

Fig.7best efficiency

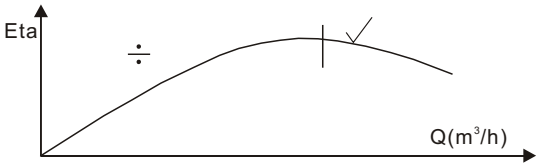


Fig.8 dimensional data

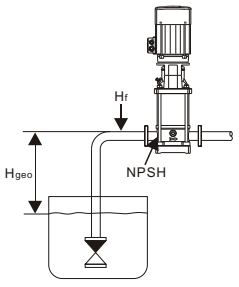

3. pump material

The material variant(RV,RVA)should be selected based of the liquid to be pump.
RVA wetted parts are made of AISI304.
RV pump body is made of cast-iron and .
Wetted parts are made of AISI304.

4. Pump connections

selection of pump connection depend on the rated pressure and pipework. To meet any requirement the RV, RVA pump offer a wide range of flexible connection such as:

- DIN frange.
- PJE coupling.
- union connection.
- Other connections on request.

5.shaft seal

As standard, the RV AND RVA range is fitted with a cartridge type suitable for themost common applications. The following key parameters must be taken in to account , when selecting the shaft seal:

- type of pumped liquid.
- liquid temperature and
- maximum pressure.

Inlet pressure and operating pressure

The limit values stated on page 10 and page 11 must not be exceeded as regards

- maximum inlet pressure and
- maximum operating pressure.

Fig. 9 RV pump

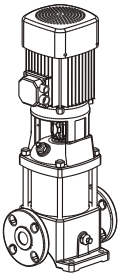

Fig. 10 pump connections

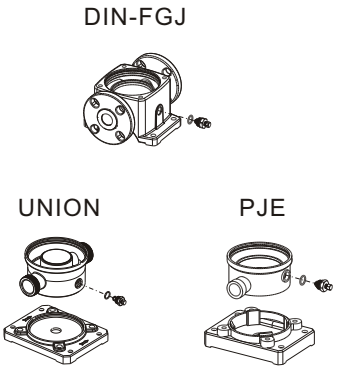

Fig.11 Shaft seal (cartridge type)

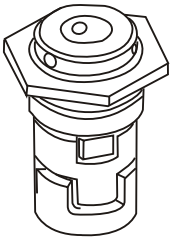

Fig.12 Inlet pressure and operating pressure

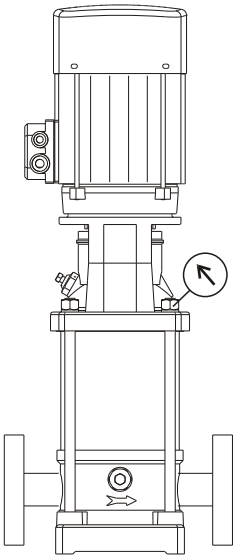

Minimum inlet pressure-NPSH

Calculation of the inlet pressure "H" is recommended in these situations :

- the liquid temperature is high.
- the flow is significantly higher than the rated flow.
- water is drawn from depths.
- water is drawn through long pipes.

inlet conditions are poor. to avoid cavitation, make sure that there is a minimum pressure on the suction side of the pump.

The maximum suction lift "H" in metres head can be calculated as follows:

$H=P_b*10.2-NPSH-Hf-Hv-Hs$

P_b = Barometric pressure in bar.
(Barometric pressure can be set to 1 bar).
in closed systems,P_b indicates the system pressure in bar.

NPSH = Net positive suction Head in metres head.
(To be read from the NPSH curve at the highest flow the pump will be deivering).

Hf = Friction loss in suction pipe(unit:m).
(At the highest flow the pump will be delivering.)

Hv = Vapour pressure (unit:m).
(To be read from the vapour pressure scale).

Hs = safty margin=minimum 0.5 metres head.

If the "H" calculted is positive,the pump can operate at a suction lift of maximum "H" metres head. If the "H" calculted is negative,
an inlet pressure of minimum "H" metres head is required.

Example:

P_b=1bar
pump model:RVA10,50Hz
flow: 10m^3/h
NPSH(P36 reference:2.1 metres head.
liquid temperature:+50C
Hv(reference picture4):1.3metres head.
$H=P_b*10.2-NPSH-Hf-Hv-Hs$
$H=1*10.2-2.1-3.0-1.3-0.5=3.3$(metres)

It means the pump can operate at a suction lift of maximum 3.3 metres head.

exchaged meter head to bar:
1 metre head=1*0.0981=0.0981bar
exchaged metre head to kpa:
1 metre head=1*9.81=9.81kpa.

Fig.13 Mimimum inlet pressure-NPSH

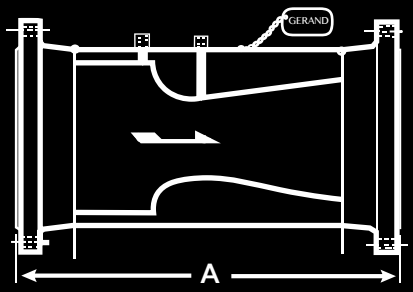
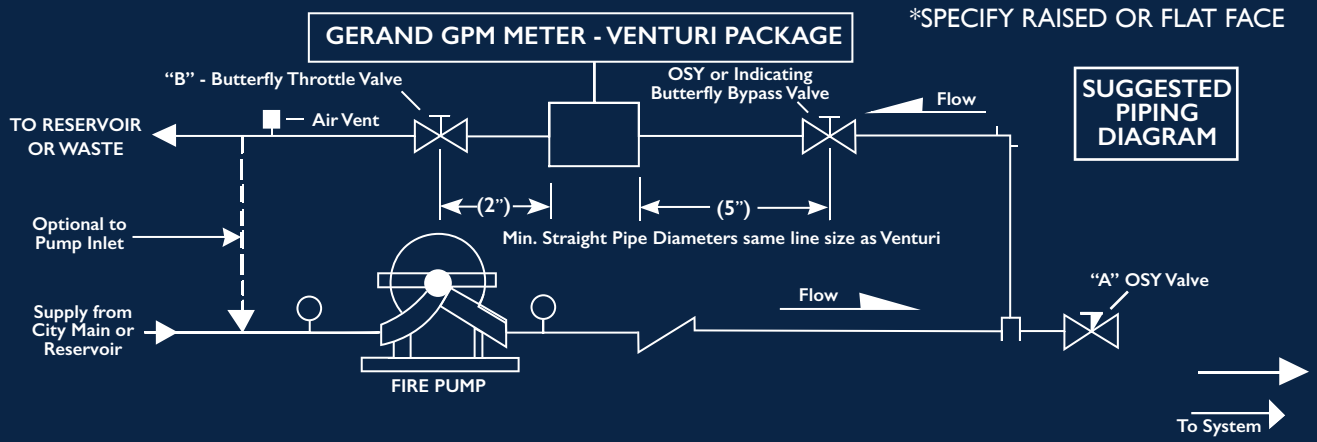
FLANGED



OPERATING INSTRUCTIONS



1. Close system OSY valve "A"
2. Open by-pass valve and "B" butterfly throttle valve
3. Purge meter, located on venturi, as follows:
   a) Open station shut-off valves on venturi & vent valves attached to meter. When a steady stream of water passes through hose, meter is purged of air.
   b) Close the vent valves after purging.
4. Start the fire pump, and read meter in GPM.
5. Refer to pump GPM requirement and adjust throttle valve to meet the requirement.
6. After the test, open valve "A" and close the by-pass and "B" valves.

Pressure Gauge

0	***SUBMITTED FOR APPROVAL***				
Rev	***Description***	***Prepared***	***Checked***	***Approved***	***Date***

Bourdon Tube Pressure Gauges
Standard Series
Type 111.10SP

Applications

- Fire sprinkler systems
- Suitable for all media that will not obstruct the pressure system or attack copper alloy parts

Product Features

- UL-listed (UL-393), United States and Canada
- Factory Mutual (FM) approved
- Reliable and economical

Bourdon Tube Pressure Gauge Type 111.10SP

Specifications

Design
EN 837-1 & ASME B40.100

Sizes
4” (100 mm)

Accuracy class
± 3/2/3% of span (ASME B40.100 Grade B)

Ranges
0/80 psi (5,5 bar), retard to 250 psi (17 bar), air
0/300 psi (20 bar), water
0/400 psi (28 bar), water
0/600 psi (40 bar), water

Working pressure
Steady: 3/4 of full scale value
Fluctuating: 2/3 of full scale value
Short time: full scale value

Operating temperature
Ambient: -40°F to 140°F (-40°C to 60°C)
Media: 140°F (+60°C) maximum

Temperature error
Additional error when temperature changes from reference temperature of 68°F (20°C) ±0.4% of span for every 18°F (10°K) rising or falling.

Bourdon tube
Material: copper alloy
C-shape

Pressure connection
Material: copper alloy
1/4“ NPT lower mount (LM)

Movement
Copper alloy

Dial
White aluminum with stop pin; black and red lettering

Pointer
Black aluminum

Case
Black polycarbonate

Window
Snap-in clear polycarbonate

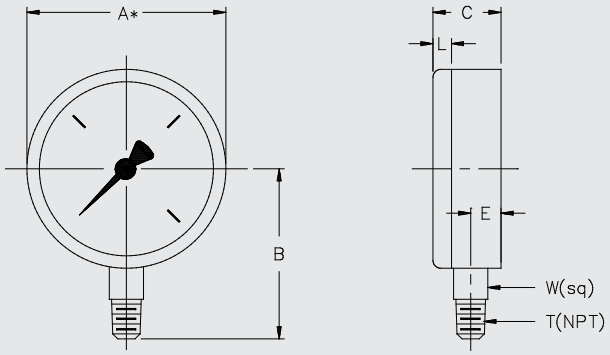
Approvals
UL listed (UL-393)
Factory Mutual

Optional Extras

(not all options are UL or FM approved)

- Brass restrictor
- Black-painted steel case
- Custom dial layout
- Other dual scales in combination with psi are available: bar, kPa, MPa, kg/cm²

Dimensions



Size		A	B	C	E	L	T	W	Weight
4”	mm	100	71	30	11.5	3.75		14	
	in	4.0	2.79	1.18	0.45	0.15	1/4”	0.55	0.35 lb.

Bourdon tube pressure gauge
Model 111.11, welding gauge to ISO 5171

for further approvals
see page 2

Applications

- For equipment and plants for welding, cutting and allied processes

Special features

- Design per ISO 5171
- Pressure relief in case back
- Reliable and cost-effective

Bourdon tube pressure gauge model 111.11

Description

Design
ISO 5171

Nominal size in mm
40, 50, 63

Accuracy class
2.5

Scale ranges
Welding engineering standard ranges for oxygen and acetylene to ISO 5171, as well as 0 ... 1 to 0 ... 400 bar to EN 837-1

Pressure limitation
Steady: 3/4 x full scale value
Fluctuating: 2/3 x full scale value
Short time: Full scale value

Permissible temperature
Ambient: -20 ... +60 °C
Medium: +60 °C maximum

Temperature effect
When the temperature of the measuring system deviates from the reference temperature (+20 °C): max. ±0.4 %/10 K of the span

Standard version

Process connection
Copper alloy, lower mount (LM), with restrictor
NS 40: G 1/8 B (male), 14 mm flats
NS 50,63: G 1/4 B (male), 14 mm flats

Pressure element
Copper alloy (with acetylene, max. 70 % copper content), C-type or helical type

Movement
Copper alloy

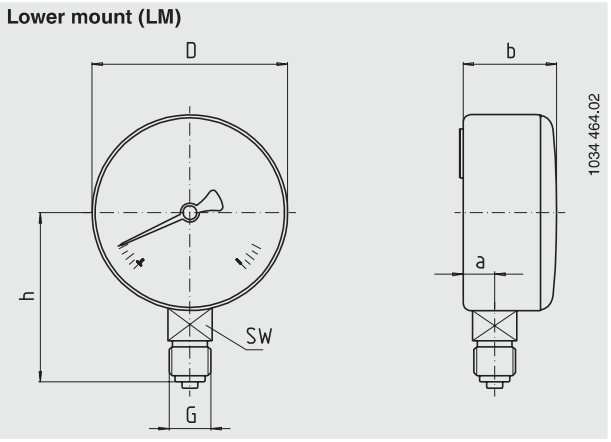
Dial
Plastic, white, with pointer stop pin
Black lettering

Pointer
Plastic, black

Dimensions in mm

Standard version

Lower mount (LM)



NS	Dimensions in mm						Weight in kg
	a	b	D	G	h ±1	SW	
40	9.5	26	39	G ⅛ B	36	14	0.09
50	9.5	28	49	G ¼ B	45	14	0.11
63	9.5	28	62	G ¼ B	53.5	14	0.15

Process connection per EN 837-1 / 7.3

Ordering information
Model / Nominal size / Scale range / Connection size / Options

Case
Steel, brass-coloured,
with pressure relief in case back

Window
Polycarbonate, snap-fitted in case

Options

- Other process connection
- Sealings (model 910.17, see data sheet AC 09.08)
- Case brass or stainless steel
- Slip-on bezel
- Back mount (BM)
- Acetylene pressure gauge for pressure regulators for manifold systems per ISO 7291 (BAM tested)

CE conformity

Pressure equipment directive
97/23/EC, PS > 200 bar, module A, pressure accessory

Approvals

- **GOST**, metrology/measurement technology, Russia
- **GOST-R**, import certificate, Russia
- **CRN**, safety (e.g. electr. safety, overpressure, ...), Canada

Certificates [1)]

- 2.2 test report per EN 10204 (e.g. state-of-the-art manufacturing, material proof, indication accuracy)
- 3.1 inspection certificate per EN 10204 (e.g. indication accuracy)

1) Option

Model 513 & 513A

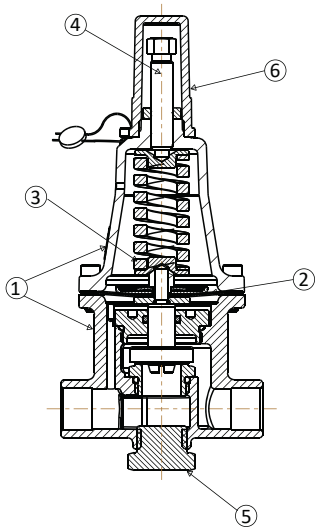
Pressure Relief Control Valve

UL LISTED EX27976

- FLUID® Model 513 Pressure Relief Control Valve is a direct-acting, spring loaded, diaphragm type relief valve.
- Model 513 is available with Brass construction as standard & model 513A is available with stainless steel construction.
- The PRV is intended to use in fire systems where maintaining pressure limit is critical for smooth operation to open & shut within close differential pressure limits.
- Available in Globe & Angle type configuration and suitable for vertical & horizontal installation.
- PRV set pressure is field adjustable with a range from 20 psi to 150 psi for LP model & 150 psi to 300 psi for HP model.
- Pressure gauge port (¼") is provided for accurate pressure setting.

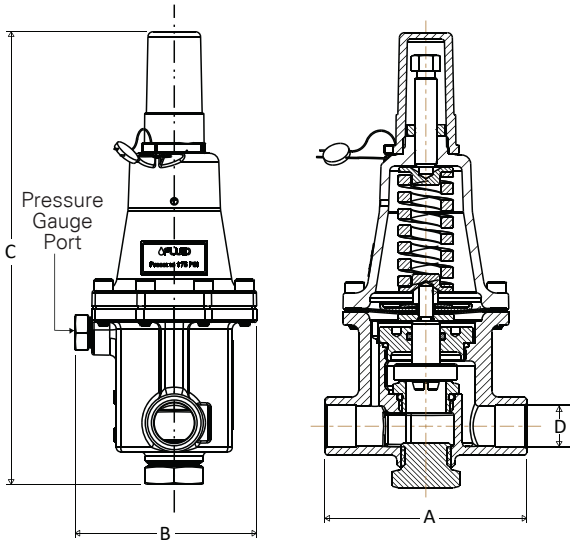
Material Specification

Sr. No.	Items	Model 513	Model 513A
1	Body & Cover	Brass	Stainless Steel (CF-8M)
2	Diaphragm	EPDM/NBR	EPDM/NBR
3	Spring Guide	Stainless Steel (SS316)	Stainless Steel (SS316)
4	Adjustment Screw	Brass	Stainless Steel (SS316)
5	Plug	Brass	Stainless Steel (SS316)
6	Tamper Proof Cap	ABS Plastic	ABS Plastic



Dimensions

Nominal Size mm / in	A	B	C	D
15	90	82.5	205	½" NPT
½	3.54	3.25	8.07	½" NPT
20	90	82.5	210	¾" NPT
¾	3.54	3.25	8.27	¾" NPT



Pressure Relief Control Valve

Model 513 & 513A

Operation

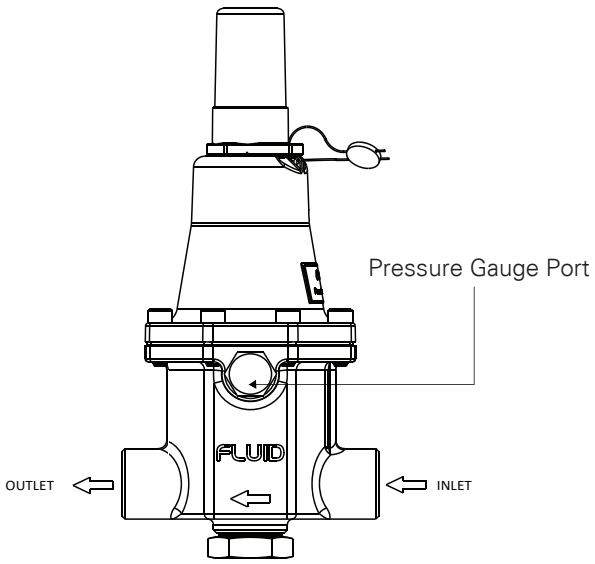
Typically used in Fire Protection, FLUID® Pressure Relief Valve prevents excess pressure built up in a system. At a point when pressure exceeds the set limit, the valve opens, releasing excess pressure to the atmosphere & when pressure falls below the set point, the valve closes drip tight to its normally closed position.

The single port is closed by the force of the adjustable spring located above the pressure sensing diaphragm. When the force exceeds the force of the spring the valve will open to relieve the pressure and will close tight when pressure falls below the preset value.

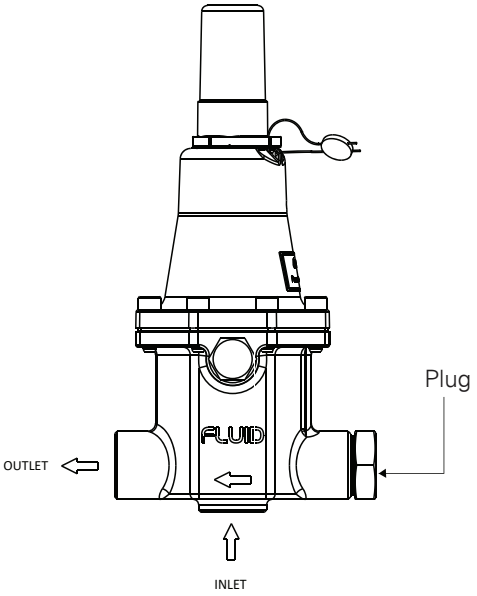
Pressure adjustment can be done at field by turning the adjusting screw to vary the spring load within the adjustable range. The adjustment cap is wire sealed to prevent unauthorized tampering of set point.

Configuration

Model 513 & 513A PRV is a versatile design which can be installed either in globe or angle pattern configuration for ease of installation.



GLOBE PATTERN



ANGLE PATTERN

Adjustable Range & Set Point

Model	Size	Adjustable Range		Factory Set Point*		Maximum Pressure Rating		Installation	Approval
		psi	bar	psi	bar	psi	bar

Angle Fire Pump Relief Valve
FL x FL Ends

FIG. F1329

Specifications

- Flanged to EN 1092-2 PN16, ANSI Class125/150/250. (Other available on request)
- Opens quickly; maintains pressure within close limits.
- Wide range adjustable: 65psi - 300psi (4.5 bar - 21 bar).
- Pilot operated main valve.
- Reduced cavitation design.
- Simple field adjustable pressure setting, requiring no special tools or system down time.
- Closes gradually for surge-free operation.
- UL 1478 Listed and FM 1361 Approved.
- Limits maximum pump discharge pressure.
- Factory tested & preset to requirements.
- Applicable for water, foam.
- 300psi (21bar) high Working Pressure 600psi (42bar) Hydrostatic Test
- Fusion Bonded Epoxy Coated Interior and Exterior to AWWA C550 Standard.

Subject : WARRANTY CERTIFICATE – FIRE PUMP SET

Dear Sir,

We hereby inform that material supplied by us for the above-mentioned project details as per the following:

1- **FIRE FIGHTING PUMP SET WITH CAPACITY (GPM @ BAR) – Brand MENA**

Is under WARRANTY for (12) months from delivery/invoice date against Manufacture or Malfunction Defect and it is Limited only for Supplying or Repairing Free of Charge defective parts of material supplied by us.

The warranty shall not apply in the following situations:

- Defect arises from any modification undertaken by the customer/client or a third party without consent of our team
- Normal wear and tear
- Failure to observe the operating instructions
- Over-loading
- Mishandling the equipment or improper use.

Thanks & Best Regards,

For Mena Mech. Ind. Co.
