VOLKAN KÖKLÜ
BOARD MEMBER

As ATLAS GROUP, we have been growing rapidly with the strength and support we have received from you since our establishment, and we have been adding many new products to our manufacturing portfolio every day. We are experiencing the excitement and pride of being able to offer you the best quality products at the most affordable price by using the latest technology in our production. We have made incredible progress in such a short time, and by delivering our products to the farthest corners of the world, we have become the preferred brand in the world as well as in our country. Our direct exports to approximately 30 countries are growing every day and even in these days of the global crisis, the curve of our company is constantly moving us up. We interpret this how the ATLASPOOL brand has been adopted in the market, and we are working uninterruptedly to be worthy of the trust of our customers in the future.

As ATLAS GROUP, we are a group of companies. In this relay race, each of us is watching the other with interest and we welcome every success with excitement and do not allow the slightest intimidation. As long as we feel our valued customers by our side, we are confident that we will overcome any obstacles we may encounter with determination and take this race a little further every day. ATLASPOOL serves the pool equipment industry in many areas. With its production and marketing approach that complies with the standards and does not compromise on quality, it offers our customers a wide range of pool products where you can find quality and reasonable prices together. Our company, which has TSE and international documents, renews itself day by day in an effort to be worthy of your trust, and increases its capacity and diversity even more.

ATLASPOOL offers all kinds of convenience to its customers with its knowledge in the field of pool business and makes it possible to work together in confidence with its experienced staff. With its quality, economic and functional features, we not only introduce you to our own products, but also offer world-class brands at the most affordable prices. We do not listen to the suggestions and criticisms of our customers, on the contrary, we welcome such approaches with respect and thank you for guiding us even better. We greet you with respect and express that we will be honored to walk into the future with you tomorrow, as we did yesterday and today. Regards...

In this method, ozone in the form of bubbles from the pool output will be observed.
The bubble outlet is the closest feeder to the engine room or observed in the diet.
It is a recommended method in domestic and small pools.
In the use of ozone system, 0.3-0.6 Ppm chlorine in the system and pH should be kept in the range of 7.2-7.4.
It is recommended to use with automatic dosing system.

IMPORTANT ISSUES IN THE SYSTEM INSTALLATIONS

Operating voltage must be between 220 V 50 hz (180-240 V).

Ventilation holes on the device must be open , Not covered for any reason , or closed.

Measures must be taken for water splash or prevention of dripping on the device.

Absolutely use water-holding unit and check valve in ozone connection.

The place where the device operates should be in %50 humidity and ensure that it is not up to 25 degrees.

The place where the device operates should be provided dust-free, fresh air inlet.

Do device exterior cleaning with a moist cloth ,after separating from the electric.

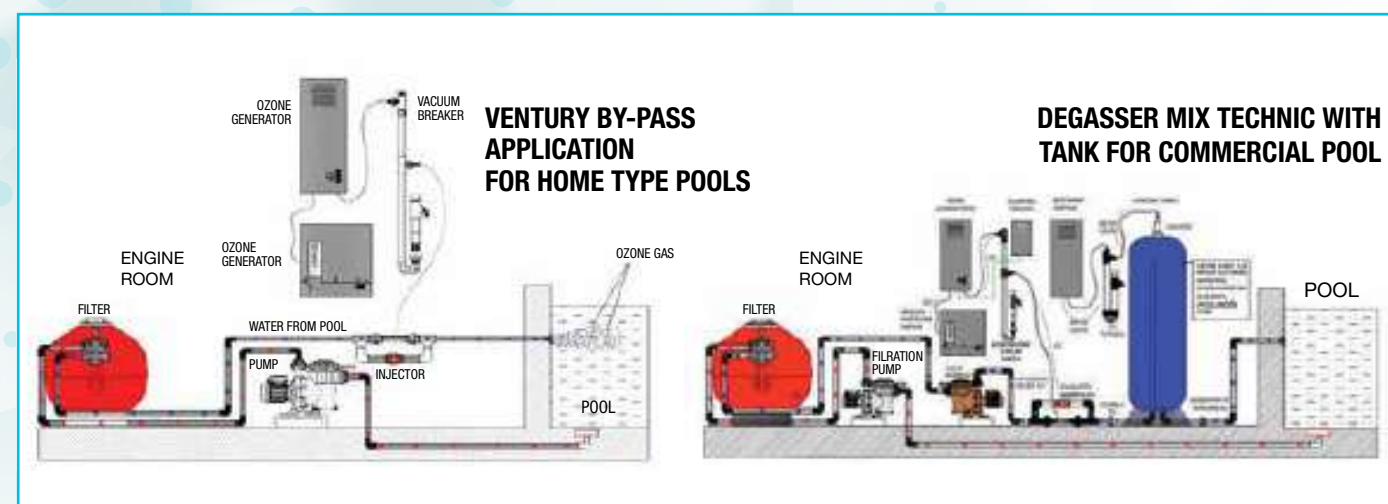

Do not insert and drop any objects into the ventilation grille.

Do not use an ozone generator in bathrooms, kitchens and similar environments

Never breathe the ozone gas,It can destroy the respiratory system at high rates.

Immediately switch off the appliance in case of ozone gas odor and Ventilate the environment.

MAKE THE INSTALLATION, FIXING AND USAGE OF DEVICE BY YOUR AUTHORIZED PERSON. IF NOT FOLLOWED THE ABOVE REQUIREMENTS, THE DEVICE SHOULD EXCEED THE WARRANTY SCOPE.

SALT CHLORINE EQUIPMENT

LATEST TECHNOLOGY TITANIUM ELECTRODES
OUTSTANDING SERVICE SYSTEM
LARGE LCD RETRO ILLUMINATED DISPLAY

HOW DOES IT WORK

- Pool water is slightly salty: 4 g/l (9 times less than sea water).
- The salt water chlorinator is attached to the filtration system of the pool.
- Salt is converted by the unit into chlorine, a powerful disinfectant, and dissolves immediately in water.
- The chlorine produced is used to eliminate bacteria, algae and microorganisms. 04% salt is added to 1m³ of pool water.
- Chlorine removed by the UV effects of sunlight is continuously renewed by the unit without any intervention.

RELIABILITY

- State-of-the-art titanium electrodes are coated with a special long-lasting alloy.
- Their design and selection of parts ensure exceptional uptime.
- 2-year unconditional warranty, salt water chlorinator: Regardless of the cause of any malfunction or damage to the unit, The control box and unit will be repaired or replaced within 24 months from the date of purchase.

EASY TO CONTROL

- Easy adjustments using the large LCD retro backlit display.
- Programming clock to independently set filtration times and chlorine production.

Precipitator	Flocculant	0,03 – 0,2 lt / day for 100 m3 pool water.
Polisher	Clarifier	0,03 – 0,2 lt / day for 100 m3 pool water.
Foot Disinfection	Fungicide Disinfecting Agent	0,5 % used by watering
Surface Cleaner	Surface Disinfection	1 % used by watering
Winter Maintenance	Against Mossiness And Freezing In Winters	3-4 lt for 100 m3 pool water, dependent upon hardness of water this process is repeated once in a month

WARNINGS

- While using chemical materials the labels shall be read carefully and instructions shall be followed
- The products shall never be mixed with each other, firstly one of them shall be thrown to the pool and then the other one.
- Gloves shall be used while chemical products are used, if there occurs eye contact eyes shall be washed with lots of water and immediately the person whose eye has contacted with these chemicals shall go to doctor for control.
- Chemical products shall be kept out of reach of children in a place which is dry, closed and airy and do not get closer to these chemicals with fire.

Problem and Solution (for 100m³)

PROBLEM	CAUSE	SOLUTION
Blurry water	1- High pH 2- Over resolved solids 3- Bad Filtering 4- Over organic subsidence	1- Adjust pH between 7,2 - 7,6 2- Change some of the pool water with fresh water 3- Clean the filter with reverse washing. Perform the flocculant process by using 2 liters liquid flocculant for 100m ³ water (shock effect). 4- Perform shock chlorination with granule chlorine which has 90% ratio.
Green water	Algae formation	Perform chlorination with granule chlorine 90%. Add 2.5 liters of algae inhibitor to the 100m ³ pool after brushing and sweeping the surfaces,
Brown water	Presence of iron or manganese	Perform shock chlorination and add 1 liter of flocculant for 100m ³ water.
Eye and skin irritation - Bad smell	1- Unadjusted pH 2- Overdose combined chlorine	1- Adjust pH between 7,2 - 7,6 2- Perform shock chlorination by adding 1 liter of 90% ratio chlorine to 100m ³ water 3- Do not use the pool for 2 days.

PUTTING INTO USE OF THE POOL IN THE BEGINNING OF THE SEASON

The processes below shall be followed in order to prohibit the problems that can be occurred during season.

- All the equipments shall be reviewed; if necessary the service shall be called.
- If it is necessary, the pool shall be emptied and then bottom of the pool and the side walls of the pool shall be cleaned with watered moss solvent.
- If the pool is empty, fill it up with water, if it is already filled up with water then make the filtration sytem work.
- Perform the precipitation process by using 2 litres precipitator for 100 m3 water. 3-4 hours after the precipitator is added to the water stop the filtration process. Perform the sweeping process after one night passes.
- Restart the filtration system.
- Bring the pH and alkaline values to ideal values.
- Evaluate all the measurement values again (ph). Alkaline, chlorine, combined chlorine, solidity.
- Perform shocking process with chlorine which has 90 % ratio.

Start to routine implementation after the pool is put into use and the controls are completed.

SUPERIORS BY PLATE HEAT EXCHANGERS BY OTHER HEAT EXCHANGERS

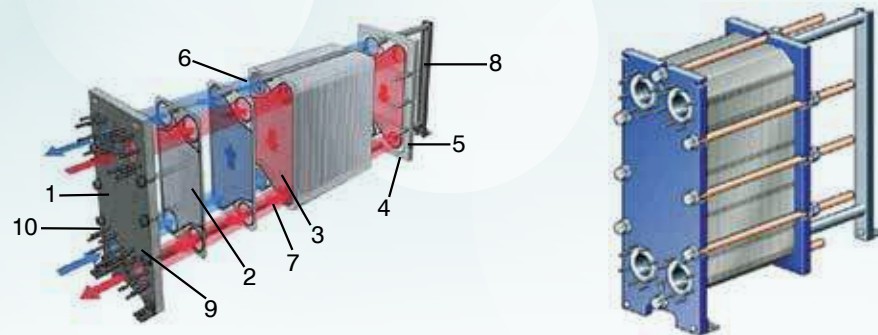

It takes up little space, is efficient and economical.

- Easily cleaned in case of clogging and contamination.
- New plates can be added when capacity needs to be increased.
- Completed plates can easily be replaced with new ones.
- The prices are cheap because they are efficient.

Today Heat pumps are the most economical way to efficiently heat 0-200 m3 special outdoor or indoor pools from May to September (or depending on the region from October to April).

SPECIFICATIONS OF HEAT PUMPS

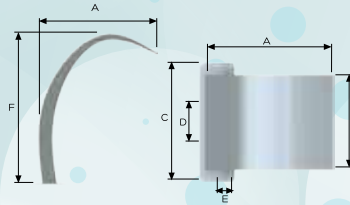

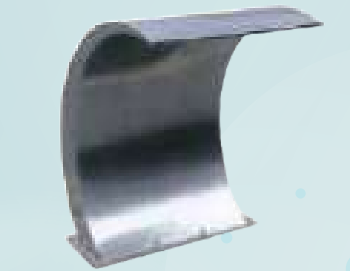

- The Heat Pump converts the solar energy in the air into heat and transfers it to the water in the pool.
- With each 1 kWh of electricity saved in the electricity meter, the zodiac heat pumps provide 5 kW / h heat transfer to your pool so you can use the free energy by 80%.
- The ratio between the power supplied by the heat pump in your pool and the power required for operation is called COP (Performance coefficient).
- Focusing on the needs of pool users, Zodiac has the heat pumps at the highest cop in the market It works extremely quiet.
- Heat pumps operate at temperatures above + 5, + 6 °C.
- However, Powerforce and Optipac models also have FOUR SEASON models operating at temperatures up to -8, -10 ° C.
- Outdoors, next to the machine room it must be installed by a pool of technicians.
- Heat pumps can be installed into the machine room is available in versions.

USAGE OF GLUE

- To be glued surface must be clean.
- Apply to desired area with brush and combine the pieces
- For better adhesion, we recommend that the surface be clean of burrs and surface dirt with sandpaper.
- The openness of the glue and the drying time depend on the ambient conditions and the amount applied.
- It is suitable for pressure and drain.

Storage Conditions

24 months as from production date in its original capped package.

Keep the mouth tightly closed at +10 ° C and + 25 ° C in dry place.

The background of the advertisement is a photograph of a luxurious indoor spa. It features a large, curved wall with multiple arched openings, each containing a glass-enclosed hot tub. The architecture is classical, with large, light-colored columns supporting a high ceiling. The floor is made of light-colored stone tiles. A blue semi-transparent overlay covers the left and center portions of the image. On the right side, there are several overlapping diamond shapes in various shades of blue and white. The Atlaspool logo is prominently displayed on the left, and the page range '134 ► 139' is shown in a large blue diamond on the right.
